Consumer Health Protection Inspections Performed
1/27/2025 - 1/31/2025
Report amended on 2/3/2025 due to clerical errors

Marigold Cafe – 5161 Lang Ave NE C – Current Status: Approved

Marigold Cafe – 5161 Lang Ave NE C
Description – Food Service Establishment
Activity Date – 1/30/2025 Service- CORRECTIVE ACTION COMPLIANCE/ Result-IN COMPLIANCE/ Action- APPROVED

Marigold Café has provided documentation of the corrective actions taken to restore compliance. The HVAC vents have been thoroughly cleaned, the dish machine is effectively sanitizing and has been tested by the person in charge, and the can opener blade has been cleaned and sanitized. Bulk food containers are now properly labeled with the common names of food items, all food products are correctly dated, and employees are adhering to proper hair restraint requirements. Additionally, all handwashing fixtures, walls, floors, and equipment have been cleaned and sanitized.

Taylor Ranch Community Center – 4900 Kachina NW – Current Status: Approved

Taylor Ranch Community Center – 4900 Kachina NW
Description –Food Service Establishment
Activity Date – 1/27/2025 Service- HIGH RISK/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed
Violation: Maintenance and Operation
- Good Repair and Proper Adjustment-Equipment
  - 4-501.11

Observed equipment not maintained in good repair. Location: back side of kitchen Type of Equipment: Ice machine Condition of the equipment: Ice machine not working properly and is in need of service so staff can properly use to cool or cold hold products
Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Violation: Surface Not Clean
- Nonfood Contact Surfaces - Cleaning Frequency
  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Violation: Plumbing
- Backflow Prevention, Air Gap
  - During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Dions – 4717 Central Ave NE
Description – Food Service Establishment
Activity Date – 1/27/2025 Service- HIGH RISK/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed

Violation: Food Identification, Safe, Unadulterated and Honestly Presented
- Food Storage Containers Identified with Common Name of Food
  - 3-302.12

Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Violation: Surface Not Clean
- Nonfood Contact Surfaces - Cleaning Frequency
  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Violation: Operations
- Permit Posted
  - 9-6-1c General

Instructed PIC that the permit to operate must be posted in a conspicuous place on the premises of the Food Establishment and made available for examination by the Enforcement Authority. Provided a copy of the valid permit for posting.

Violation: Physical Facilities, Cleaning
- Cleaning, Frequency and Restrictions
  - Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris in The Kitchen Area and to clean and sanitize walls, ceiling, ceiling vent covers and floors throughout the facility .

Violation: Plumbing
- Prohibiting a Cross Connection, Pipes Labeled
  - 5-205.15(B)

Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean
- Equipment, Food-Contact Surfaces, Nonfood-Contact Surfaces, and Utensils - Grease/Soil Deposits, Cooking Equipment
  - 4-601.11(A), 4-602.11, 4-702.11

Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

St Charles Borromeo School – 1801 Hazeldine Ave SE – Current Status: Approved

St Charles Borromeo School – 1801 Hazeldine Ave SE
Description – Food Service Establishment
Activity Date – 1/27/2025 Service- HIGH RISK/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed
Violation: Poisonous and Toxic/Chemical Substances
- Separation-Storage
  - Poisonous or toxic materials shall be stored and displayed for retail so they cannot contaminate food, equipment, utensils, linens, and single-service and single-use articles by separating the poisonous or toxic materials by spacing or partitioning and locating the poisonous or toxic materials in an area that is not above food, equipment, utensils, linens, and single-service and single-use articles. Instructed PIC to move toxic chemicals to an approved location and that contaminated single-service and single-use articles must be discarded.

Violation: Testing Devices
- Food Temperature Measuring Devices
  - The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices

Chipotle – 2608 Central Ave SE – Current Status: Approved

Chipotle – 2608 Central Ave SE
Description – Food Service Establishment
Activity Date – 1/27/2025 Service- HIGH RISK/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed
Violation: Hands Clean & Properly Washed
- When to Wash
  - Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands. Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Violation: Testing Devices
- Food Temperature Measuring Devices
  - 4-302.12

The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to replace damaged internal ambient air food temperature measuring devices.

Avengers Learning Center – 9901 Central Ave NE – Current Status: Approved

Avengers Learning Center – 9901 Central Ave NE
Description –Food Service Establishment
Activity Date – 1/27/2025 Service- VERY HIGH RISK/ Result-IN COMPLIANCE/ Action- APPROVED

Wendys – 2203 Wyoming Blvd NE – Current Status: Approved

Wendys – 2203 Wyoming Blvd NE
Description – Food Service Establishment
Activity Date – 1/27/2025 Service- HIGH RISK/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed
Violation: Personal Cleanliness
- Prohibition-Jewelry
  - Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Violation: Plumbing
- System Maintained in Good Repair
  - 5-205.15(B)

Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
- Backflow Prevention, Air Gap
  - During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Freddys Frozen Custard & Steakburgers -- 2550 CENTRAL AVE SE, 200 – Current Status: Approved

Freddys Frozen Custard & Steakburgers -- 2550 CENTRAL AVE SE, 200
Description – Food Service Establishment
Activity Date – 1/27/2025 Service- HIGH RISK/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed
Violation: Surface Not Clean
- Nonfood Contact Surfaces - Cleaning Frequency
  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Panera – 4201 Coors Blvd NW
Description – Food Service Establishment
Activity Date – 1/27/2025 Service- HIGH RISK/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed
Violation: Operation and Maintenance
- Cleaning of Handwashing Fixtures
  - Observed handwashing fixtures with the build up of soil residues. The plumbing fixture was the paper towel dispenser above hand washing sink in kitchen near large combi ovens The condition of the surface was soil and debris build up

Handwashing facilities are critical to food protection and must be maintained in operating order at all times so they will be used. Handwashing sinks shall be cleaned as often as necessary to keep them clean. Instructed PIC to clean handwashing sink(s).
Violation: Ventilation and Hood Systems
- Heating, Ventilation, Air Conditioning System Vents
  - Observed interior intake and exhaust air ducts with debris build up. Location: Back kitchen area above clean dish drying rack next to three compartment sink

Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
Violation: Physical Facilities
- Outer Openings, Protected
  - Observed doors to the outside that are not tight fitting, light can be seen at the edges.

The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Violation: Surface Not Clean
- Nonfood Contact Surfaces - Cleaning Frequency
  - Observed nonfood contact surface with the build up of soil residues. The surface was located Upright coolers/freezers, exterior of ovens, Shelving where cleaning tablets are stored, dry storage shelving under make line steam wand on expresso machine, spray nozzle on three compartment sink. The condition of the surface was food and soil debris build up

Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Violation: Personal Cleanliness
- Prohibition-Jewelry
  - 2-303.11

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively prepping and cooking orders and working with open food Inappropriate Jewelry Observed: Wristwatch

Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

- Effectiveness-Hair Restraints
    - Observed a food employee without proper hair restraints. Location: kitchen area and main line in kitchen Activity: Actively prepping and cooking orders and working with open food

Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Violation: Physical Facilities, Cleaning
- Cleaning, Frequency and Restrictions
    - Observed build up and debris on the floors and walls and in floor drains of the facility. Mainly under equipment and in hand to reach areas

Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on floor and walls in kitchen area and to clean and sanitize

Violation: Physical Facilities, Construction and Repair
- Repairing-Premises, Structures, Attachments, and Fixtures-Methods
    - Observed the following areas of the facility in disrepair. Observed wall behind dish machine in disrepair by large portion of wall cut out approx 12inch by 6 inch

Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have large hole repaired so that it is able to serve their intended purpose properly.

Violation: Plumbing
- System Maintained in Good Repair, Repaired According to Law
    - 5-205.15(B)

Observed Drainpipe under dump sink in back of kitchen by walk in cooler is not maintained in good repair or is not repaired by law. Observed Drainpipe found in disrepair by small leak coming from piping and leaking on to floor at time of the inspection

5-205.15(B)
Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Violation: Date Marking and Disposition
- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition
    - 3-501.17, 3-501.18

Observed ready-to-eat time and temperature controlled for safety food held within the establishment exceeding the seven (7) day limit. Location: make line reach in cooler Food Items: Half & Half 1/21/2025 Banana Parfait. 1/26/2025, Liquid egg mix 1/16/2025

3-501.17, 3-501.18
Ready-to-eat, time/temperature control for safety food commercially prepared and opened, held longer than a 24 hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24 hour period inside the facility. PIC voluntarily discarded food items bearing no date markings

The Kosmos – Bar -- 1715 5th ST NW – Current Status: Approved

The Kosmos – Bar -- 1715 5th ST NW
Description – Food Service Establishment
Activity Date – 1/27/2025 Service- ROUTINE FOOD INSPECTION/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed
Violation: Operation and Maintenance
- Using a Handwashing Sink-Operation and Maintenance
  - 5-205.11

Handwashing facilities can become sources of contamination if the sinks used for other purposes such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purposes other than handwashing

The Kosmos – Kitchen -- 1715 5th ST NW – Current Status: Approved

The Kosmos – Kitchen -- 1715 5th ST NW
Description – Food Service Establishment
Activity Date – 1/27/2025 Service- ROUTINE FOOD INSPECTION/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed
Violation: Physical Facilities, Cleaning
- Cleaning, Frequency and Restrictions
  - Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on the ceiling and light fixtures in the kitchen area and to clean and sanitize the ceiling and light fixtures.

Violation: Physical Facilities, Construction and Repair
- Repairing-Premises, Structures, Attachments, and Fixtures-Methods
  - Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have holes in ceiling repaired so that it is able to serve their intended purpose properly.

Violation: Preventing Contamination From Hands
- Preventing Contamination from Hands, No Barehand Contact with RTE food
  - 3-301.11 (B)

Except when washing fruits and vegetables or ready-to-eat food that is being added as an ingredient to food that will be cooked to a temperature of at least 145 degrees. Handwashing with plain soap and water, as specified in the Food Code, may not be an adequate intervention to prevent the transmission of pathogenic microbes to ready-to-eat foods via bare hand contact. Cooking foods to the temperatures required in the Food Code will reduce the likelihood of survival of pathogens that might be transferred from an employee's hands to the surface of the ready-to-eat foods. Instructed PIC that the food contacted by the employee with bare hands must not be used in the food operation and that employees must be retrained on bare hand contact procedures with ready-to-eat food.

Violation: Food Separation
- Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination
  - Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

Cake Fetish – 2665 Louisiana Blvd NE
Description –Food Service Establishment
Activity Date – 1/28/2025 Service- ROUTINE FOOD INSPECTION/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed

Violation: Food Identification, Safe, Unadulterated and Honestly Presented
- Food Storage Containers Identified with Common Name of Food
  - 3-302.12

Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Violation: Storage
- In-Use Utensils, Between-Use Storage
  - 3-304.12

Multiuse utensils which have been cleaned and sanitized can become contaminated with pathogens which can be transferred to food from utensils that have been stored on surfaces which have not been cleaned and sanitized. Instructed PIC to clean and sanitize utensils prior to continuing use, must be maintained cleaned in a regular schedule as prescribed by the code and to store items so that the risk of contamination prior to use is minimized.

Violation: Plumbing
- System Maintained in Good Repair
  - 5-205.15(B)

Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
- Backflow Prevention, Air Gap
  - Corrective Action: 4. During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow

Muta Market – 3609 Comanche Rd NE – Current Status: Approved

Muta Market – 3609 Comanche Rd NE
Description – Food Service Establishment
Activity Date – 1/28/2025 Service- HIGH RISK/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed

Violation: Food Identification, Safe, Unadulterated and Honestly Presented
- Package Integrity
  - 3-202.15

Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. Instructed PIC to ensure all food with compromised packaging is not offered for sale and is segregated for return. OR PIC voluntarily discard food items in compromised packaging.
- Honestly Presented
  - Food shall be offered for human consumption in a way that does not mislead or misinform the consumer. Instructed PIC to discard expired item,

Violation: Cold Holding
- Time/Temperature Control for Safety Food, Cold Holding
  - 3-501.16(A)(2) and (B)

Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
- Cold Holding Capacities-Equipment
  - The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.

Barbacoa Juarez - 4100 Central AVE SW
Description – Food Service Establishment
Activity Date – 1/29/2025 Service- HIGH RISK/ Result-IN COMPLIANCE/ Action- CONDITIONAL APPROVED

Violations Observed

Violation: Food Identification, Safe, Unadulterated and Honestly Presented
- Food Storage Containers Identified with Common Name of Food
  - Corrective Action: 2. 3-302.12

Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Violation: Storage
- Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing
  - Corrective Action: 16-32. 4-903.11

Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.

Violation: Physical Facilities
- Outer Openings, Protected
  - Corrective Action: 1. 6-202.15

The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.

Violation: Physical Facilities, Construction and Repair
- Repairing-Premises, Structures, Attachments, and Fixtures-Methods
  - Corrective Action: 9. Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Violation: Testing Devices
- Food Temperature Measuring Devices

Violation: Equipment, Food Contact Surfaces, and Utensils Clean
- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch
  - Corrective Action: 11-12. 4-601.11(A), 4-602.11, 4-702.11

Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Violations Observed

Violation: Maintenance and Operation
- Cutting Surfaces
  - Corrective Action: 4. Cutting surfaces such as cutting boards and blocks that become scratched and scored may be difficult to clean and sanitize. As a result, pathogenic microorganisms transmissible through food may build up or accumulate. These microorganisms may be transferred to foods that are prepared on such surfaces. Instructed PIC to resurface the cutting board, or discard if not capable of being resurfaced.

Violation: Personal Cleanliness
- Effectiveness-Hair Restraints
  - Corrective Action: 10. 2-402.11

Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints. Observed PIC obtain and provide beard restraints to employees. Violation corrected on site.

Violation: Physical Facilities, Construction and Repair
- Floors, Walls and Ceilings-Cleanability
  - Corrective Action: 9. Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have outlet cover repaired/replaced so that it is able to serve their intended purpose properly.

Viets Pho – 4208 Menaul Blvd NE
Description – Food Service Establishment
Activity Date – 1/29/2025 Service- HIGH RISK/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed

Violation: Physical Facilities, Construction and Repair
- Repairing-Premises, Structures, Attachments, and Fixtures-Methods
  - Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have Holes in the ceiling in the kitchen area repaired so that it is able to serve their intended purpose properly.

Violation: Food Separation
- Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination
  - Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

Violation: Thawing
- Thawing Method
  - 3-501.13

Freezing prevents microbial growth in foods, but usually does not destroy all microorganisms. Improper thawing provides an opportunity for surviving bacteria to grow to harmful numbers and/or produce toxins. Food must be thawed in an approved method such as: A. under refrigeration maintaining food below forty-one (41) degrees F or below, B. submerged under running water at seventy (70) degrees F, or below with sufficient velocity to agitate and float off loose particles in the overflow, if ready-to-eat does not go above forty-one (41) degrees F, or if raw does not exceed forty-one (41) degrees F for four (4) hours including the cooking or re-cooling process C. in a microwave oven only when the food will be immediately transferred to conventional cooking facilities as part of a continuous cooking process, or when the entire, uninterrupted cooking process takes place in the microwave oven D. as part of the cooking process E. prepared for immediate service in response to an individual consumer's order Instructed PIC to retrain food employees on thawing food and PIC corrected violation by pork steak and pork roasts were put in three compartment sink under cold running water and in reach in cooler all meat was frozen and in the temperature limits

Violation: Date Marking and Disposition
- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition
  - 3-501.17, 3-501.18

Ready-to-eat, time/temperature control for safety food commercially prepared and opened, held longer than a 24 hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24 hour period inside the facility.

Wings Gone Wild Beef Jerky - 120 98TH ST SW, C1
Description – Food Service Establishment
Activity Date – 1/29/2025 Service- HIGH RISK/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed

Violation: Designated Areas
- Designated Areas-Employee Accommodations for eating/drinking/smoking
  - Corrective Action: 5. Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Violation: Surface Condition
- Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent
  - Corrective Action: 3. Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.

Violation: Storage
- Food Storage-Preventing Contamination from the Premises
  - Corrective Action: 4. Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.

Violation: Consumer Advisories
- Compliance with Food Law, Labeling
  - Corrective Action: 2. 3-602.12 Food labels serve as a primary means by which consumers can make informed decisions about their food selections and answer questions including ingredients, allergens, weight, and manufacturer. Food must be labeled as specified by 21 CFR 101 - Food labeling, and 9 CFR 317 Labeling, marking devices, and containers. This must include: (1) The common name of the food, or absent a common name, an adequately descriptive identity statement; (2) If made from two or more ingredients, a list of ingredients and sub ingredients in descending order of predominance by weight, including a declaration of artificial colors, artificial flavors and chemical preservatives, if contained in the food; (3) An accurate declaration of the net quantity of contents; (4) The name and place of business of the manufacturer, packer, or distributor; and (5) The name of the food source for each major food allergen contained in the food unless the food source is already part of the common or usual name of the respective ingredient. (6) Nutrition labeling as specified in 21 CFR 101 - Food Labeling and 9 CFR 317 Subpart B Nutrition Labeling, if required by law. (7) For any salmonid fish containing canthaxanthin or astaxanthin as a color additive, the labeling of the bulk fish container, including a list of ingredients, displayed on the retail container or by other written means, such as a counter card, that discloses the use of canthaxanthin or astaxanthin Instructed PIC to correct mislabeled food product prior to continuing to offer for sale.

Violation: Warewashing Temperature and Concentration
- Sanitizers, Criteria-Chemicals
  - Corrective Action: 7a. The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 25-49ppm must also be at a minimum temperature of 120F with a contact time of 10 seconds. PIC corrected by pic remaking sanitizer of 50 ppm at 70 degrees f.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch
  - Corrective Action: 11-12. 4-601.11(A), 4-602.11, 4-702.11

Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Taco Tote – 4701 Central Ave NE – Current Status: Approved

Taco Tote – 4701 Central Ave NE
Description –Food Service Establishment
Activity Date – 1/29/2025 Service- HIGH RISK/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed

Violation: Physical Facilities, Construction and Repair

- Repairing-Premises, Structures, Attachments, and Fixtures-Methods
  - Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Violation: Food Separation

- Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination
  - Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch
  - 1-12. 4-601.11(A), 4-602.11, 4-702.11

Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

National Assn. Letter Carriers Sunshine Branch – 123 Quincy St NE – Current Status Approved

National Assn. Letter Carriers Sunshine Branch – 123 Quincy St NE
Description – Food Service Establishment
Activity Date – 1/29/2025 Service- HIGH RISK/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed

Violation: Pest Control

- Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Edelweiss American German Club - 4821 MENAUL BLVD NE – Current Status Approved

Edelweiss American German Club - 4821 MENAUL BLVD NE
Description –Food Service Establishment
Activity Date – 1/29/2025 Service- HIGH RISK/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed

Violation: Food Identification, Safe, Unadulterated and Honestly Presented
- Food Storage Containers Identified with Common Name of Food
  - 3-302.12

Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Taco Bell – 4901 Gibson Blvd SE – Current Status: Approved

Burrow Cafe – 12501 Candelaria NE, F
Description – Food Service Establishment
Activity Date – 1/31/2025 Service- HIGH RISK/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed

Violation: Operation and Maintenance
- Using a Handwashing Sink-Operation and Maintenance
  - Corrective Action: 1. 5-205.11

Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Observed PIC immediately remove blender from basin of hand washing sink during inspection. Instructed PIC to keep handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained. Violation corrected on site.

Violation: Personal Cleanliness
- Effectiveness-Hair Restraints
  - Corrective Action: 10. 2-402.11

Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on utilizing proper hair restraints.

Violation: Physical Facilities, Construction and Repair
- Floor and Wall Junctures, Coved, and Enclosed or Sealed
  - Corrective Action: 4. When cleaning is accomplished by spraying or flushing, coving and sealing of the floor/wall junctures is required to provide a surface that is conducive to water flushing. Grading of the floor to drain allows liquid wastes to be quickly carried away, thereby preventing pooling which could attract pests such as insects and rodents or contribute to problems with certain pathogens such as Listeria monocytogenes.

Violation: Warewashing Temperature and Concentration
- Sanitizers, Criteria-Chemicals
  - Corrective Action: 7a. The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 25-49ppm must also be at a minimum temperature of 120F with a contact time of 10 seconds. Instructed PIC to contact repair personnel to have warewashing machine serviced. Also instructed PIC to discontinue use of warewashing machine and to utilize three compartment sink for warewashing until warewashing machine is repaired. A copy of completed work order must also be provide to CHPD when repairs to warewashing machine are completed.

Orchid Thai Cuisine – 4300 Central Ave SE
Description – Food Service Establishment
Activity Date – 1/29/2025 Service- HIGH RISK/ Result-IMMEDIATE CLOSURE/ Action- IMMEDIATE CLOSURE

Violations Observed

Violation: Designated Areas
- Designation-Dressing Areas and Lockers
  - Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented
- Food Storage Containers Identified with Common Name of Food
  - 3-302.12

Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Violation: Poisonous and Toxic/Chemical Substances
- Separation-Storage
  - The storage of poisonous or toxic materials directly above or adjacent to food could result in contamination of the food from spillage. Poisonous or toxic materials must be stored so they cannot contaminate food, equipment, utensils, linens, and single-service and sing-use articles by separating the poisonous or toxic materials by spacing or partitioning; and storing them in an area that is not above food, equipment, utensils, linens, and single-service or single-use articles. Instructed PIC to move chemicals to an approved location.
- Common Name-Working Containers
  - When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Violation: Operation and Maintenance
- Using a Handwashing Sink-Operation and Maintenance
  - Corrective Action: 1. 5-205.11

Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

Violation: Ventilation and Hood Systems
- Cleaning Ventilation Systems, Nuisance and Discharge Prohibition
  - Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
- Heating, Ventilation, Air Conditioning System Vents
  - Heating, ventilating, and air conditioning systems shall be designed, installed, and maintained so that make-up air intake and exhaust vents do not cause contamination of food, contact surfaces, equipment, or utensils.

Violation: Personal Cleanliness

- Eating, Drinking, or Using Tobacco Products

  - Corrective Action: 8. A food employee may drink from a closed beverage container if the container is handled to prevent the contamination of the employee's hands, the container, and exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles. Instructed PIC that employee drinks should be kept in a designated area and should be in a cup with a lid and straw.

Violation: Preventing Contamination From Hands

- Preventing Contamination from Hands, No Barehand Contact with RTE food

  - 3-301.11 (B)

Except when washing fruits and vegetables or ready-to-eat food that is being added as an ingredient to food that will be cooked to a temperature of at least 145 degrees. Handwashing with plain soap and water, as specified in the Food Code, may not be an adequate intervention to prevent the transmission of pathogenic microbes to ready-to-eat foods via bare hand contact. Cooking foods to the temperatures required in the Food Code will reduce the likelihood of survival of pathogens that might be transferred from an employees hands to the surface of the ready-to-eat foods. Instructed PIC that the food contacted by the employee with bare hands must not be used in the food operation and that employees must be retrained on bare hand contact procedures with ready-to-eat food.

Violation: Knowledgeable

- Knowledgeable Person In Charge

  - 2-101.11, 2-102.11(C)(2),(3) and (17), 2-103.11, 2-201.11(A)(B)(C)(D), 2-501.11

A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

Violation: Testing Devices

- Food Temperature Measuring Devices

  - 4-302.12

The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

- Sanitizing Solutions, Testing Devices

  - 4-302.14, 4-501.116

Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Violation: Cold Holding

- Time/Temperature Control for Safety Food, Cold Holding

  - 3-501.16(A)(2) and (B)

Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Violation: Availability

- Cleaning Agents and Sanitizers, Availability

  - The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75F with a contact time of 7 seconds. Instructed PIC sanitizer must be available at all times inside kitchen during operation to properly clean and sanitize.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch
  - Corrective Action: 11-12. 4-601.11(A), 4-602.11, 4-702.11

Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Violations Observed

Violation: Designated Areas
- Designation-Dressing Areas and Lockers
  - Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Violation: Ventilation and Hood Systems
- Heating, Ventilation, Air Conditioning System Vents
  - Heating, ventilating, and air conditioning systems shall be designed, installed, and maintained so that make-up air intake and exhaust vents do not cause contamination of food, contact surfaces, equipment, or utensils.

Violation: Maintenance and Operation
- Cutting Surfaces
  - Cutting surfaces such as cutting boards and blocks that become scratched and scored may be difficult to clean and sanitize. As a result, pathogenic microorganisms transmissible through food may build up or accumulate. These microorganisms may be transferred to foods that are prepared on such surfaces. Instructed PIC to resurface the cutting board, or discard if not capable of being resurfaced.

Violation: Pest Control
- Controlling Pests, If Present: Treatment
  - Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Violation: Maintenance

- Maintaining Premises, Unnecessary Items and Litter
    - Corrective Action: 10-11. 6-501.114

The presence of unnecessary articles, including equipment which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions
    - Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on bar floors and to clean and sanitize on a regular basis
- Drying Mops
    - Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying

Violation: Physical Facilities, Construction and Repair

- Floor and Wall Junctures, Coved, and Enclosed or Sealed
    - Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have bar walls repaired so that it is able to serve their intended purpose properly.

Violation: Plumbing

- System Maintained in Good Repair, Repaired According to Law
    - 5-205.15(B)

Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Instructed PIC to contact repair personnel to have bar walls repaired so that it is able to serve their intended purpose properly.

Violation: Plumbing
- System Maintained in Good Repair, Repaired According to Law
  - 5-205.15(B)

Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Sheraton Albuquerque Airport Hotel – Kitchen – 2910 Yale Blvd SE
Description – Food Service Establishment
Activity Date – 1/29/2025 Service- ROUTINE FOOD INSPECTION/ Result-IMMINENT HEALTH HAZARD/ Action- IMMEDIATE CLOSURE

Violations Observed

Violation: Maintenance and Operation
- Cutting Surfaces
  - Cutting surfaces such as cutting boards and blocks that become scratched and scored may be difficult to clean and sanitize. As a result, pathogenic microorganisms transmissible through food may build up or accumulate. These microorganisms may be transferred to foods that are prepared on such surfaces. Instructed PIC to resurface the cutting board, or discard if not capable of being resurfaced.

Violation: Pest Control
- Controlling Pests, If Present: Treatment
  - Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Violation: Physical Facilities
- Exterior Walls and Roofs, Protective Barrier
  - The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
- Outer Openings, Protected
  - 6-202.15

The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.

Violation: Surface Not Clean
- Nonfood Contact Surfaces - Cleaning Frequency
  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Violation: Maintenance
- Maintaining Premises, Unnecessary Items and Litter
  - 6-501.114

The presence of unnecessary articles, including equipment which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions

  - Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on facility floors and drains and to clean and sanitize on a regular basis.

Violation: Physical Facilities, Construction and Repair

- Floor and Wall Junctures, Coved, and Enclosed or Sealed

  - Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have walls, floors and ceilings repaired so that they are able to serve their intended purpose properly.

Violation: Plumbing

- Backflow Prevention, Air Gap

  - During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

- System Maintained in Good Repair, Repaired According to Law

  - 5-205.15(B)

Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Sheraton Albuquerque Airport Hotel – Kitchen – 2910 Yale Blvd SE
Description – Food Service Establishment
Activity Date – 1/31/2025 Service- HIGH RISK/ Result-IN COMPLIANCE/ Action- CONDITIONAL APPROVED

Violations Observed

Violation: Pest Control
- Controlling Pests, If Present: Treatment
  - Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.
- Insect Control Devices, Design and Installation
  - 6-202.13

Exposed food and food-contact surfaces must be protected from contamination by insects or insect parts. Installation of the device over food preparation areas or in close proximity to exposed food and/or food-contact surfaces could allow dead insects and/or insect parts to be impelled by the electric charge, fall, or be blown from the device onto food or food-contact surfaces. Insect control devices are not allowed to be installed above food preparation areas. Instructed PIC to move the device and to clean and sanitize the food preparation area that was under the device.

Violation: Physical Facilities
- Exterior Walls and Roofs, Protective Barrier
  - The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
- Outer Openings, Protected
  - 6-202.15

The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.

Violation: Corrective Actions
- Infestation Corrective Actions: Clean Up After Rodents
  - 9-6-1a Infestation

Food Establishments shall remove rodent droppings in accordance with current Centers for Disease Control and Prevention recommendations published on the Enforcement Authority's website. Instructed PIC that the following steps must be taken when cleaning rodent droppings: https://www.cdc.gov/healthypets/pets/wildlife/clean-up.html Clean up rodent urine and droppings Step 1: Put on rubber or plastic gloves. Step 2: Spray urine and droppings with bleach solution or an EPA-registered disinfectant until very wet. Let it soak for 5 minutes or according to instructions on the disinfectant label. Step 3: Use paper towels to wipe up the urine or droppings and cleaning product. Step 4: Throw the paper towels in a covered garbage can that is regularly emptied. Step 5: Mop or sponge the area with a disinfectant. Clean all hard surfaces including floors, countertops, cabinets, and drawers. Follow instructions below to clean and disinfect other types of surfaces. Step 6: Wash gloved hands with soap and water or a disinfectant before removing gloves. Step 7: Wash hands with soap and warm water after removing gloves or use a waterless alcohol-based hand rub when soap is not available and hands are not visibly soiled.

Violation: Surface Not Clean
- Nonfood Contact Surfaces - Cleaning Frequency
  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on facility floors and drains and to clean and sanitize on a regular basis.

Violation: Physical Facilities, Construction and Repair

- Floor and Wall Junctures, Coved, and Enclosed or Sealed

- Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have walls, floors and ceilings repaired so that they are able to serve their intended purpose properly.

Violation: Plumbing

- Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

- System Maintained in Good Repair, Repaired According to Law

- 5-205.15(B)

Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- 4-601.11(A), 4-602.11, 4-702.11

Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Sheraton Albuquerque Airport Hotel – Kitchen – 2910 Yale Blvd SE

Bamboo – 7202 Menaul Blvd NE – Current Status: Closure

Bamboo – 7202 Menaul Blvd NE
Description –Food Service Establishment
Activity Date – 1/27/2025 Service- HIGH RISK/ Result-IMMINENT HEALTH HAZARD/ Action- IMMEDIATE CLOSURE

Violations Observed

Violation: Food Identification, Safe, Unadulterated and Honestly Presented
- Food Storage Containers Identified with Common Name of Food
  - Corrective Action: 2. 3-302.12

Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Violation: Storage
- In-Use Utensils, Between-Use Storage
  - 1. 3-304.12

During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under ﷺ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.

Violation: Pest Control
- Controlling Pests, If Present: Treatment
  - Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Violation: Physical Facilities
- Outer Openings, Protected
  - 1. 6-202.15

The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.

Violation: Surface Condition
- Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent
  - Nonfood-contact surfaces of equipment routinely exposed to splash, or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.

Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Violation: Surface Not Clean

- Nonfood Contact Surfaces - Cleaning Frequency

  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions

  - Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on the kitchen area Floors and storage areas.

Violation: Cold Holding

- Time/Temperature Control for Safety Food, Cold Holding

  - 2. 3-501.16(A)(2) and (B)

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

  - : 11-12. 4-601.11(A), 4-602.11, 4-702.11

Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Violations Observed

Violation: Ventilation and Hood Systems
- Ventilation Hood Systems, Drip Prevention and Adequacy
  - Corrective Action: 8. Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Violation: Lighting
- Light Bulbs, Protective Shielding
  - Corrective Action: 1. 6-202.11

Instructed PIC to make repairs necessary so that light bulbs are shielded, coated, or made otherwise shatter-resistant to prevent the contamination of exposed food, clean equipment, utensils, linens, or unwrapped single-service-single-use articles.

Violation: Pest Control
- Controlling Pests, If Present: Treatment
  - Corrective Action: 4. Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by routinely inspecting incoming shipments of food and supplies, routinely inspecting the premises for evidence of pests, and eliminating harborage conditions. Instructed PIC to provide EHD with their standard operating procedures and pest control plan.

Violation: Physical Facilities
- Outer Openings, Protected
  - Corrective Action: 1. 6-202.15

The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.

Violation: Surface Not Clean
- Nonfood Contact Surfaces - Cleaning Frequency
  - Corrective Action: 5. Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Violation: Physical Facilities, Cleaning
- Cleaning, Frequency and Restrictions
  - Corrective Action: 5. Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on Floors and walls in the facility and clean and sanitize.

Violation: Consumer Advisories
- Allergen Warning, Unpackaged Food
  - Corrective Action: 4. Unintended food allergen food allergen exposures poses a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch
  - Corrective Action: 11-12. 4-601.11(A), 4-602.11, 4-702.11

Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

328 Chinese Cuisine – 5617 Menaul Blvd NE, A – Current Status: Closure

Cinnamon and Sugar – 7921 Central Ave NW

Description –Food Service Establishment

Activity Date – 1/30/2025 Service- ROUTINE FOOD INSPECTION/ Result-IN COMPLIANCE/ Action- APPROVED

Violations Observed

Violation: Designated Areas

- Designation-Dressing Areas and Lockers
  - Corrective Action: 4. Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Violation: Poisonous and Toxic/Chemical Substances

- Identifying Information, Prominence-Original Containers
  - Corrective Action: 3. When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

- Separation-Storage
  - Corrective Action: 4-7. The storage of poisonous or toxic materials directly above or adjacent to food could result in contamination of the food from spillage. Poisonous or toxic materials must be stored so they can not contaminate food, equipment, utensils, linens, and single-service and sing-use articles by separating the poisonous or toxic materials by spacing or partitioning; and storing them in an area that is not above food, equipment, utensils, linens, and single-service or single-use articles. Instructed PIC to move chemicals to an approved location.

Violation: Medications and First Aid Kits

- Restriction and Storage-Medicines, Employee Medication
  - Corrective Action: 2. 7-207.11(B)

Medicines that are in a food establishment for the employees' use shall be labeled and located to prevent the contamination of food, equipment, utensils, linens, and single-service and single-use articles. Instructed PIC to move medications to an approved location and ensure they are labeled properly.

Violation: Hands Clean & Properly Washed

- When to Wash
  - Corrective Action: 3. Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands. Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Violation: Ventilation and Hood Systems

- Heating, Ventilation, Air Conditioning System Vents
  - Corrective Action: 8. Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Violation: Hot Holding & Reheating

- Time/Temperature Control for Safety Food, Hot Holding
  - Corrective Action: 6. If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165F and to maintain temperature at 135F and above.

Violation: Maintenance and Operation

- Good Repair and Proper Adjustment-Utensils
  - Corrective Action: 5. A utensil can act as a source of contamination to the food it contacts if it is not maintained in good repair. Instructed PIC to repair or replace utensil.
- Good Repair and Proper Adjustment-Equipment
  - Corrective Action: 12-13. 4-501.11

Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Violation: Surface Not Clean

- Nonfood Contact Surfaces - Cleaning Frequency
  - Corrective Action: 5. Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions
  - Corrective Action: 5. Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on floors and drains and to clean and sanitize on a REGULAR BASIS.

Violation: Food Separation

- Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination
  - Corrective Action: 1-2. 3-302.11(A1&2)

It is important to separate foods in a ready-to-eat form from raw animal foods during storage, preparation, holding and display to prevent them from becoming contaminated by pathogens that may be present in or on the raw animal foods. Except when frozen or combined as ingredients; non-ready-to-eat raw animal foods must be separated from ready-to-eat raw animal foods such as molluscan shellfish or fish for sushi, or other raw ready to eat food, cooked ready-to-eat food, and fruits and vegetables prior to washing. Instructed PIC that the food not separated from the non-ready-to-eat raw animal food must not be used in the food operation or must be cooked to a temperature sufficient to act as a kill step for pathogens. Instructed PIC to store foods in a manner that protects ready-to-eat food from contamination.

- Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cleaning
  - Corrective Action: 4. Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

Violation: Knowledgeable

- Knowledgeable Person In Charge
  - Corrective Action: 2. 2-101.11, 2-102.11(C)(2),(3) and (17), 2-103.11, 2-201.11(A)(B)(C)(D), 2-501.11

A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

Violation: Training Records

- Food Handler Cards
  - Corrective Action: 3. Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
- Training Records
  - Corrective Action: 2. 9-6-1i General

Food handler cards shall be kept by the Food Employee on their Person while working as a Food Employee or volunteer for a Food operation, or a copy shall be kept on file by the current employer and be made available for inspection by the Enforcement Authority. If trained through another approved method; records of the training shall be maintained for the duration of the Food Employee's employment. Instructed PIC to provide updated training records to EHD for review.

- Certified Food Protection Manager
  - Corrective Action: 1. 2-102.12(A)

All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Violation: Cold Holding

- Time/Temperature Control for Safety Food, Cold Holding
  - Corrective Action: 2. 3-501.16(A)(2) and (B)

Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Violation: Consumer Advisories

- Consumer Advisory Consumption of Animal Foods
  - Corrective Action: 5. Notice must be provided to consumers that animal-derived foods that are not subjected to adequate heat treatment pose a risk because they may contain biological agents that cause foodborne disease and must communicate the risk on the consumer's health status and the food being consumed. Instructed PIC that consumers must be informed of the significantly increased risk of consuming animal foods not processed to eliminate pathogens or served raw, or undercooked through both a disclosure and a reminder. The disclosure shall include: (1) a description of the animal-derived foods, such as oysters on the half shell (raw oysters), raw-egg Caesar salad, and hamburgers (can be cooked to order); or (2) identification of the animal-derived foods by asterisking them to a footnote that states that the items are served raw or undercooked, or contain (or may contain) raw or undercooked ingredients. Reminder shall include asterisking the animal-derived foods requiring disclosure to a footnote that states: (1) regarding the safety of these items, written information is available upon request; (2) consuming raw or undercooked meats, poultry, seafood, shellfish, or eggs may increase your risk of foodborne illness; or consuming raw or undercooked meats, poultry, seafood, shellfish, or eggs may increase your risk of foodborne illness, especially if you have certain medical conditions.
- Allergen Warning, Unpackaged Food
  - Corrective Action: 4. Unintended food allergen food allergen exposures poses a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.

Violation: Warewashing Temperature and Concentration

- Sanitizers, Criteria-Chemicals
  - Corrective Action: 7c. The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55F. PIC corrected violation by making fresh 100pp bucket.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch
  - Corrective Action: 11-12. 4-601.11(A), 4-602.11, 4-702.11

Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Violation: Date Marking and Disposition

- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition
  - Corrective Action: 1. 3-501.17, 3-501.18

Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24 hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24 hour period inside the facility.
