Corrective Action Compliance does not represent a full routine health inspection. Instead, it reflects that a facility has taken specific corrective actions in response to violations identified during an inspection. These actions may be taken during the inspection or afterward, and the Corrective Action Compliance allows for the facility's grade or status to be updated based on those corrections. Corrective actions may be demonstrated through documentation such as photos, videos, receipts, work orders, site visits, or both verifiable means showing that the violation has been addressed and compliance has been achieved.

APPROVED

An "Approved" grade indicates that a food establishment that has demonstrated compliance with the standards in the Food Code the Food Service and Retail Ordinance, other industry standards, and other laws and has received a Grade of Approved and is able to operate.

CONDITIONAL APPROVED

A "Conditional Approved" grade is issued when a facility is found to have violations of the Food Code, the Food Service and Ret Ordinance, industry standards, or applicable laws. While the facility may continue operating, it must complete specific corrective actions to address the violation A yellow sticker is placed alongside the green "Approved" sticker.

UNSATISFACTORY

An "Unsatisfactory" grade indicates that a facility has not met the required standards but is allowed to continue operating temporarily while corrective actions are completed. A red "Unsatisfactory" sticker will be displayed at the facility for the duration of this grade. This is a temporary status and requires timely follow-up to verify compliance.

CLOSED

A "Closed" grade is assigned when violations pose a significant risk to public health, requiring the facility to immediately cease operations. The facility must remain closed until corrective actions have been completed and verified. A facility with this grade will display an orange "Closed" sticker for the duration of the closure.

Acapulco Taco - 840 SAN MATEO BLVD SE
Food Establishment Class C
Date: 10/29/2026 - #: CAC-Food-102640-2026 - Inspection Result: Conditional Approved

PIC corrected violation during inspection. Placed food in shallow pans to promote faster cooling.
Cooling Methods
PIC corrected violation during inspection for proper sanitizing.
Cleaning Agents and Sanitizers, Availability
Corrected violations raised final score to Conditional Approval (Yellow).

Acapulco Taco - 840 SAN MATEO BLVD SE
Food Establishment Class C
Date: 10/29/2026 - #: PT0110914 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Chemicals

- **Warewashing Equipment, Clean Solutions**

- Failure to maintain clean wash, rinse, and sanitizing solutions adversely affects the warewashing operation. Equipment and utensils may not be sanitized, resulting in subsequent contamination of food. The wash, rinse, and sanitize solutions shall be maintained clean. Instructed PIC to change solutions and as often as necessary to keep clean. Equipment and utensils observed being cleaned and sanitized in the soiled solution must be re-cleaned and sanitized with fresh solution.
Observed improper cleaning solution use during warewashing. Detergent being used: Chlorine Manufacturer's Label Concentration: 200ppm Manufacturer's Label Temperature: 75 degrees Actual Concentration: none Actual Temperature: n/a

Violation: Date Marking and Disposition

- **Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition**

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Reach-in cooler and low boy cooler Food Items: Cheese, salsa, Carne adovada, chorizo Expiration Dates: None labeled

Violation: Cooling

- **Cooling Methods**

- The ability of equipment to cool foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate equipment with enough capacity to meet the cooling demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.
Observed insufficient equipment to properly cool food. Location: Reach in cooler Condition: Hot food overfilled in pan with insufficient cooling of cooked food.

Violation: Training Records

- **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

- **Food Handler Cards**

- Food handler cards shall be kept by the Food Employee on their Person while working as a Food Employee or volunteer for a Food operation, or a copy shall be kept on file by the current employer and be made available for inspection by the Enforcement Authority. If trained through another approved method; records of the training shall be maintained for the duration of the Food Employee's employment. Instructed PIC to provide updated training records to EHD for review.
The PIC was unable to provide records of training or certification of food employees.

Violation: Ventilation and Hood Systems

- **Heating, Ventilation, Air Conditioning System Vents**

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
Observed interior intake and exhaust air ducts with debris buildup. Location: Hood system above flat top

Violation: Availability

- **Cleaning Agents and Sanitizers, Availability**

- No sanitizer in three compartment sink. Utensils and containers not sanitized.

Violation: Physical Facilities

- **Outer Openings, Protected**

- Walls and roofs provide a barrier to protect the interior and foods from the weather, windblown dirt and debris, and flying insects. Perimeter walls and roofs of a food establishment shall effectively protect the establishment from the weather and the entry of insects, rodents, and other animals.
Observed doors to the outside that are not tight fitting, light can be seen at the edges.

Violation: Designated Areas

- **Storage-Other Personal Care Items**

- Employees shall store their personal care items in proper storage facilities. Instructed PIC to move employee belongings to an approved location.
Observed employee personal care items stored incorrectly. Location: On top of food dicer and on prep table.

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.
Observed that the facility was operating with an expired permit.

ALBERTSONS #911 - 2801 EUBANK BLVD NE, A - Approved

ALBERTSONS #911 - 2801 EUBANK BLVD NE, A
Retail Food Establishment Class 5
Date: 10/27/2026 - #: RT-RET-057734-2025 - Inspection Result: Approved

Violation: Maintenance

• Maintaining Premises, Unnecessary Items and Litter

- The presence of unnecessary articles, including equipment, which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.
Observed items on the premises of the food establishment that is no longer used or is non-functional. Location: Drawers Items list: Can opener, hammer, price gun, labels, alcohol swabs, radio, bags tools etc. Condition of the items: Disorganized, cluttered and stored together.

Violation: Physical Facilities, Construction and Repair

• Floors, Walls and Ceilings-Cleanability

- Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to remove and replace with material that is smooth and easily cleanable.
Observed holes in the wall is not smooth and easily cleanable. The surface was located in three compartment sink area walls have holes.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located inside walk in freezer. The surface was made out of plastic The condition of the surface was debris buildup on condenser fan covers.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Deli Department Spray Bottle Concentration: Below 100 parts per million Temperature: 71 to 72 °F

ALBERTSONS #911 - 2801 EUBANK BLVD NE, A
Retail Food Establishment Class 5
Date: 10/27/2026 - #: RT-RET-057642-2025 - Inspection Result: Approved

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located in meat department display area. The surface was made out of plastic The condition of the surface was closets used to store spices, labels and training information stored away with debris buildup.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed plumbing at hand washing sink leading to sanitizer is not maintained in good repair or is not repaired by law. Observed leak at hose leading to sanitizer and faucet at hand washing sink in meat cutting area and three compartment sink in display area found in disrepair by leak at hose and faucet.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature

control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Meat slicer Location: Above prep table in display area Condition of the Location: Stored away with food debris buildup.

ALBERTSONS #911 - 2801 EUBANK BLVD NE, A
Retail Food Establishment Class 4
Date: 10/27/2026 - #: RT-RET-057696-2025 - Inspection Result: Approved

Violation: Functionality and Accuracy

• Temperature Measuring Devices, Ambient Air and Water-Accuracy

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to move temperature measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures.
Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: Walk in refrigerator next to proofer Thermometer Location: None available

Violation: Maintenance

• Maintaining Premises, Unnecessary Items and Litter

- The presence of unnecessary articles, including equipment, which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.
Observed items on the premises of the food establishment that is no longer used or is non-functional. Location: Drawers Items list: Wizard wand, gum, spices, box cutter, gloves, medicine Condition of the items: Disorganized, cluttered and stored together.

Violation: Surface Not Clean

• Nonfood-Contact Surfaces, Easily Cleanable

- Hard-to-clean areas could result in the attraction and harborage of insects and rodents and allow the growth of foodborne pathogenic microorganisms. Well-designed equipment enhances the ability to keep nonfood-contact surfaces clean. Instructed PIC to replace the material with one that is easily cleanable or to modify the existing material so that it is easily cleanable.
Observed nonfood contact surface that was not easily cleanable. The surface was located in storage shelving the surface was made out of plastic The condition of the surface was food containers with purchase sticker and sticker residue on outside of containers.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at hand washing sink in bakery back area.

ALBUQ GRAND SENIOR APTS - 1501 TIJERAS AVE NE - Approved

ALBUQ GRAND SENIOR APTS - 1501 TIJERAS AVE NE
Food Establishment Class C
Date: 10/29/2026 - #: RT-FOODEST-012118-2025 - Inspection Result: Approved

Violation: Medications and First Aid Kits

• Restriction and Storage-Medicines, Prevention of Contamination

- Medicines that are in a food establishment for the employees' use shall be labeled and located to prevent the contamination of food, equipment, utensils, linens, and single-service and single-use articles. Instructed PIC to move medications to an approved location and ensure they are labeled properly.
Observed employee medication improperly stored or labeled. Location: Food service kart
Label Condition: Intact Medication Name: Ibuprofen

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.
Observed pests allowed to accumulate in traps. Location: Back storage room
Pest Type: Rodent droppings Pest Condition:
Number of Pests Present: 6 plus rodent droppings

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which

depends on sufficient volume and pressure to perform its intended functions.
Observed floor drain near ice machine is not maintained in good repair or is not repaired by law. Observed floor drain near ice machine found in disrepair by missing/broken strainer.

AN BE LLC DBA Saigon Restaurant - 6001 SAN MATEO BLVD NE, D4 - Approved

AN BE LLC DBA Saigon Restaurant - 6001 SAN MATEO BLVD NE, D4
Food Establishment Class C
Date: 10/29/2026 - #: CAC-Food-102487-2026 - Inspection Result: Approved

Corrective action taken during the routine inspection resulted in the facility being upgraded from a Conditional Approved Status to Approved Status. The person in charge promptly addressed and corrected one of the priority violations noted in the original inspection report while on site. As a result of the correction, the inspection score to Approved. The following priority violation was corrected on site:
- Sanitizers, Criteria-Chemicals. Observed PIC remade chlorine sanitizer solution during inspection.

AN BE LLC DBA Saigon Restaurant - 6001 SAN MATEO BLVD NE, D4
Food Establishment Class C
Date: 10/29/2026 - #: RT-FOODEST-105944-2025 - Inspection Result: Conditional Approved

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Walk in cooler and prep top coolers. Food Items: cut vegetables, cut meat, cut cooked shrimp, raw shrimp. Expiration Dates: no dates indicated.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food item not in cold holding unit measuring above 41°F. Location: next to prep table in a bucket with water. Food Item: sprouts. Temperature: 53°F

Violation: Warewashing Temperature and Concentration

• Sanitizers, Criteria-Chemicals

- Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR. PIC corrected violation by remaking sanitizer solution. Retested at 100ppm chlorine.
Observed chemical sanitizer concentration exceeding the maximum level permitted. Type of Sanitizer: Chlorine. Location: wiping cloth container. Concentration: above 200ppm.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floor underneath equipment on kitchen line and underneath shelving in dry storage areas.

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.
Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- Food, clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Food, clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, and protected from contamination. Instructed PIC to store items so that the risk of contamination prior to use is minimized.
Observed utensils stored improperly, items stored in under other sources of contamination. Item: knives stored in crevice in between prep top cooler and prep table.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. Location: Walk in cooler and freezer floors. Condition: Observed dried food debris and buildup

on the floors at the time of inspection.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Raw meats, shrimp, cooked shrimp, sprouts, chicken, rice, dairy, cut vegetables. Activity of the Food: stored, thawed, cooled, cooked

BASIL LEAF VIETNAMESE RESTAURANT - 1225 EUBANK BLVD NE - Conditional Approved

BASIL LEAF VIETNAMESE RESTAURANT - 1225 EUBANK BLVD NE
Food Establishment Class C
Date: 10/28/2026 - #: CAC-Food-102132-2026 - Inspection Result: Approved

Time/Temperature Control for Safety Food, Cold Holding- PIC corrected violation by discarding out of temp food items
Using a Handwashing Sink-Operation and Maintenance- PIC corrected violation by removing all containers in hand washing sink

Thawing Method- PIC corrected violation by moving thawing items to cooler and sink with cold running water

Due to Correction made facility is back into the green approved status with a final score of Approved

BASIL LEAF VIETNAMESE RESTAURANT - 1225 EUBANK BLVD NE
Food Establishment Class C
Date: 10/28/2026 - #: PT0157570 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Food slicers and 2 table mounted can openers Location: Kitchen area Condition of the Location: Substantial brown and black buildup on inside of ice bin around ice chute, Dried food debris buildup on blades of can openers and food slicer

Violation: Thawing

• Thawing Method

- Freezing prevents microbial growth in foods, but usually does not destroy all microorganisms. Improper thawing provides an opportunity for surviving bacteria to grow to harmful numbers and/or produce toxins. Food must be thawed in an approved method such as: A. under refrigeration maintaining food below forty-one (41) °F or below, B. submerged under running water at seventy (70) °F, or below with sufficient velocity to agitate and
float off loose particles in the overflow, if ready-to-eat does not go above forty-one (41) °F, or if raw does not exceed forty-one (41) °F for four (4) hours including the cooking or re-cooling process C. in a microwave oven only when the food will be immediately transferred to conventional cooking facilities as part of a continuous cooking process, or when the entire, uninterrupted cooking process takes place in the microwave oven D. as part of the cooking process E. prepared for immediate service in response to an individual consumer's order Instructed PIC to retrain food employees on thawing food and PIC corrected violation.
Observed frozen time/temperature control for safety food improperly thawing. Food: Raw meat and Sauce Location: Sink and prep table Condition: Frozen Method: Raw Meat submerged in water in sink with no running cold water. Sauce left out on prep table at room temperature

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.
Observed wiping cloths improperly used. Observed soiled wiping cloths Stored on prep tables and cutting boards

Violation: Cooling

• Cooling Methods

- Instructed PIC to use an alternate method of cooling to minimize the opportunity for pathogen growth; recommended to utilize one or more methods such as 1) Place the food in a shallow pan 2) Separate the food into smaller or thinner portions 3) Use rapid cooling equipment 4) Stir the food in a container placed in an ice/water bath 5) Use containers that facilitate heat transfer 6) Only partially cover product, if protected from overhead contamination.
Observed TCS food items cooling in a method that does not facilitate the necessary rate of heat transfer to cool the food in an appropriate time frame. Location: Reach in cooler and prep area Food Items: Soup, Shrimp and sauce Manner: Stored in cooler covered and stored on prep area with no cooling logs

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on

the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Prep top coolers and prep table
Food Items: Sprouts 50°F, Chopped Green Onions 53°F, Chopped Cabbage 59°F, Sliced Green Onions 49°F, Cooked Chicken 63°F, Raw Meat 55°F, Sliced Carrots 57°F, Sprouts and Lettuce 51°F, Tofu 54°F

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.
Observed food stored improperly less than six (6) inches off the floor. Location: Kitchen area under prep table, Kitchen area on side of prep top cooler and side area near office Food Item: Soup, frozen chicken and cabbage

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products. Observed Employee drinks and food items throughout kitchen area including coolers, prep tables, and cabinets

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.
Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.
Observed handwashing sink(s) was observed blocked or inaccessible. Location: Handwashing sink in servers' station and in kitchen Manner: sanitizer buckets stored in basins of handwashing sink

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: Wrist jewelry

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.
Observed a soiled mop not in use, stored directly on the floor.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under □□ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Spoon Location: Prep top cooler inside pan of chopped lemon grass Condition of the Location: Stored in pan with handle directly touching the food product inside

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are

not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located on the food service equipment The condition of the surface was debris buildup on outside of coolers, fryers and stove and frost buildup on inside of reach in freezer by managers office

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: Stored Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can opener Location: Kitchen area Condition of the Location: Dried Food debris on blade of can opener

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

BUBBAS HOLDINGS LLC - 4861 PAN AMERICAN FWY NE - Approved

BUBBAS HOLDINGS LLC - 4861 PAN AMERICAN FWY NE
Food Establishment Class C
Date: 10/28/2026 - #: CAC-Food-102082-2026 - Inspection Result: Approved

PIC corrected violation on site to bring score from conditional approval (yellow) to approved (green) status. Prohibiting a Cross Connection- Hose removed from

mop sink and wound around faucet.

Time/Temperature Control for Safety Food, Cold Holding- Chicken placed in shallow pans to sit below ice water line.
Observed PIC correcting violations while inspection was still being conducted.

BUBBAS HOLDINGS LLC - 4861 PAN AMERICAN FWY NE
Food Establishment Class C
Date: 10/28/2026 - #: PT0139577 - Inspection Result: Conditional Approved

Violation: Plumbing

• Prohibiting a Cross Connection

- Nondrinking water may be of unknown or questionable origin. Waste water is either known or suspected to be contaminated. Neither of these sources can be allowed to contact and contaminate the drinking water system. Instructed PIC to immediately remove cross connection created so that drinking water system is not at risk for contamination.
Observed an unapproved connection created between the drinking water system and a nondrinking water system or system of unknown quality. The connection is created by Hose in mop sink sitting in drain

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed Prep sink is not maintained in good repair or is not repaired by law. Observed faucet found in disrepair by leaking

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Hot Line and dry storage Food Items: Chicken wings and tenders, BBQ sauce Temperature: 53 degrees. BBQ sauce at 70 degrees

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purposes such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purposes other than handwashing.
Observed handwashing sink used for purposes other than handwashing. Location: Line sink Manner: washing out a stainless-steel bowl

Violation: Lighting

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.
Observed inadequate amount of lighting. Location: Line Manner: Light bulb blinking

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Line Activity: No male was wearing a beard guard.

Violation: Storage

• Equipment and Utensils, Air-Drying Required

- Observed clean utensils stored in a position that did not allow for self-draining or air drying.
Observed clean equipment stored in a position that did not allow for self-draining or air drying.

Violation: Physical Facilities, Construction and Repair

• Floors, Walls and Ceilings-Cleanability

- Observed the following areas of the facility in disrepair. Observed floor in Kitchen dish area in disrepair by being chipped and holding water
Observed floor is constructed of Chipped concrete making it rough and/or absorbent.

BUBBAS HOLDINGS LLC - 4861 PAN AMERICAN FWY NE
Food Establishment Class B
Date: 10/28/2026 - #: PT0139578 - Inspection Result: Approved

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located reach-in cooler The surface was holding standing water and juice of some sort.

BUBBAS HOLDINGS LLC - 4861 PAN AMERICAN FWY NE
Food Establishment Class B
Date: 10/28/2026 - #: PT0139579 - Inspection Result: Approved

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at "Outdoor bar" sink. Hose from sink was inside drain causing potential backflow.

BURGER KING - 1990 LADERA DR NW - Approved

BURGER KING - 1990 LADERA DR NW
Food Establishment Class C
Date: 10/29/2026 - #: PT0154377 - Inspection Result: Approved

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Drip Prevention and Adequacy

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating equipment surface.
Location: Grill and fryer areas.
Equipment: dripping onto grill and fryer.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the Freezer floors under the stacking racks and under soft serve Ice cream machine.

Cafe es Amor LLC - 2209 Central Ave, Suite B - Approved

Cafe es Amor LLC - 2209 Central Ave, Suite B
Food Establishment Class C
Date: 10/27/2026 - #: COM-FOODES-101445-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: reach in cooler Location: back prep area Condition of the Location: debris buildup inside the reach in cooler

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

-Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed back area and restroom area in disrepair by missing and water damaged ceiling tile and a hole in the wall by the mop sink area

CAJA DE JUGUETES CHILD DEVELOPMENT CENTER - 5801 CENTRAL AVE NW, B - Approved

CAJA DE JUGUETES CHILD DEVELOPMENT CENTER - 5801 CENTRAL AVE NW, B
Food Establishment Class C
Date: 10/28/2026 - #: RT-FOODEST-036206-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Kitchen Area Concentration: 0ppm Temperature: 76f
instructed pic to acquire Clorox Bleach which pic did and they remade spray bottle to 100ppm at 70f

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

-Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Operation and Maintenance

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.
Observed handwashing sink(s) without a handwashing sign. Location: Kitchen Area

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purposes such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purposes other than handwashing.
Observed handwashing sink used for purposes other than handwashing. Location: Kitchen Area Manner: Container being stored inside basin of sink and wash cloth on the side of the sink

Violation: Records

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.
also, facility was not documenting Cold Holding logs educated on how to document Hot Holding, Cold Holding, transportation and calibration logs.

Chipotle Mexican Grill - 4331 SAN MATEO BLVD NE - Approved

Chipotle Mexican Grill - 4331 SAN MATEO BLVD NE
Food Establishment Class C
Date: 10/28/2026 - #: COM-FOODES-101211-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed plumbing at hand washing sink, under three compartment sink and under automatic dish machine is not maintained in good repair or is not repaired by law. Observed plumbing at hand washing sink, under three compartment sink and under automatic dish machine found in disrepair by hand washing sink unable to completely shut off. Three compartment sink floor drain missing drain cover. Automatic dish machine plumbing is cut with black hose dispensing grey water and is unable to properly reach floor drain causing grey water to spill on flooring.

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Filters

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
Observed interior intake and exhaust air ducts with debris buildup. Location: In hallway between restrooms.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Main kitchen line flat top grill Activity: Cooking raw meats with no beard guard

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee does not wash hands when required. Condition: Employee donning new gloves without washing hands prior. Also, employee switching job duties without washing hands prior.

Crepe Brule - 6001 SAN MATEO BLVD NE, E1 - Approved

Crepe Brule - 6001 SAN MATEO BLVD NE, E1
Food Establishment Class C
Date: 10/29/2026 - #: PT0160615 - Inspection Result: Approved

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions. Instructed Permit holder to contact repair personnel to have leak repaired at hand washing sink within 24 hours, so that hot and cold water are readily available at the hand washing sink at all times.
Observed hand washing sink is not maintained in good repair or is not repaired by law. Observed hand washing sink found in disrepair by having the cold water turned off due to it leaking cold water when it is turned on. Permit holder stated that they turned of the cold water under the sink due to a leak found when the cold water is made available.

Violation: Availability

• Cleaning Agents and Sanitizers, Availability

- If the appropriate cleaning agents and sanitizers are not on hand at all times, they may not be available when needed to clean and sanitize equipment and utensils. It is also important that the cleaning agents and sanitizers be on hand, even at times where warewashing may not be in progress, so that their suitability can be verified by the regulatory authority and, if needed, by personnel who are responsible for servicing the equipment.
Educated PIC on how to utilize and make chlorine sanitizer during inspection. Provided some test strips for use until their regular order comes in tomorrow. Reminded PIC and permit holder that lack of sanitizer or not having sanitizer available can result in immediate closure. Instructed PIC and permit holder to provide updates for verification when quat sanitizer is available for use. Also instructed PIC to continue to use chlorine sanitizer solution until regularly used sanitizer is made available.
Observed facility uses Quat for sanitizer but did not have any available at the time of inspection. Permit holder stated that the order was made and will be delivered tomorrow. However, observed chlorine was available in facility.

DBA THE EATERY BY WISEPIES - 5700 WEST UNIVERSITY BLVD SE, #130 - Approved

DBA THE EATERY BY WISEPIES - 5700 WEST UNIVERSITY BLVD SE, #130
Food Establishment Class C
Date: 10/30/2026 - #: RT-FOODEST-076661-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F.
Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Rear kitchen dish machine
Concentration: 0 PPM

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
Observed interior intake and exhaust air ducts with debris buildup. Location: Above kitchen make line

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Active food prep Inappropriate Jewelry Observed: Wrist jewelry

Violation: Operations

• Valid Permit

- General Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.
Observed that the facility was operating with an expired permit.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and syrup debris on the floor under the fountain drink machine.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have consistent temperature logs available for TCS foods items. Food Items: All hot and cold held TCS foods Activity of the Food: Stored, thawed, cooled□

DK #747 - 8600 CENTRAL AVE SW - Approved

DK #747 - 8600 CENTRAL AVE SW
Retail Food Establishment Class 3
Date: 10/30/2026 - #: PT0144025 - Inspection Result: Approved

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed back prep and storage areas in disrepair by holes in walls behind cooking area, holes in walls in back prep and storage area and trim coming off walls in back area by three compartment sink

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located walk in cooler The surface was made out of plastic The condition of the surface walk in cooler vent covers had excessive amount of debris buildup

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with no control methods in place. Location: throughout the whole facility Pest Type: cockroach, rodent Pest Condition: living and dead as well as mice droppings and cockroaches in light covers back prep/storage area

instructed pic to remove dead rodent droppings and pests that were noted in violation and take pictures to show that this was completed and send pictures to ndvigil@cabq.goc by 11/03/26 to be in compliance

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Food must be protected from contamination of splashing water, chemical, or other foods; dust; and other contaminates. Instructed PIC to have food protected in containers/wrapping and not to store food in those areas unless the source of contamination can be mediated another way.

Observed food stored improperly where it was exposed to contamination from splash, dust, or other contamination. Location: front retail hot food storage area Food Item: Chicken Wings Condition: chicken wings not covered

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the ceiling tiles in back prep area debris buildup/ syrups drops on ceiling tile

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: back food prep area Concentration: above 400ppm in a spray bottle pic re made sanitation bottle and re tested at 200ppm

EAT MY THAI CUISINE - 5303 GIBSON BLVD SE - Conditional Approved

EAT MY THAI CUISINE - 5303 GIBSON BLVD SE
Food Establishment Class C
Date: 10/28/2026 - #: RT-FOODEST-084243-2026 - Inspection Result: Conditional Approved

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.
Observed pests allowed to accumulate in traps.
Location: Inside light fixtures, dry storage pantry, front bulk storage by lobby and utility room Pest Type: Cockroach
Pest Condition: Dead
Number of Pests Present: +15
Pest control record states no activity found

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: All reach in coolers had serval undated food items
Food Items: Chopped mangos, sauces, soups, Rangoon, chopped onions, chopped tomatoes, sliced cucumbers. Expiration Dates: Not available

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
Observed interior intake and exhaust air ducts with debris buildup.
Location: Air conditioning vent across the make line directly above the curry hot holding station

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Prep table and reach in coolers
Food Items: Chopped vegetables (48°F), chicken strips (59°F), soup (44°F), sliced carrot (51°F) sliced tomatoes (46°F), sliced cucumbers (48°F)

Violation: Designated Areas

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.
Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels
(B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.
Observed no approved method of hand drying at handwashing sink(s). Location: Kitchen handwashing station

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Active food prep of uncovered food items Inappropriate Jewelry Observed: Wrist jewelry

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the kitchen floors under make line and cooking equipment. Also observed significant amount of pooled water in the utility closet that needs to be cleaned and sanitized.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are

not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located on the interior of the reach in coolers, make line fryers, stove top and wok station. The surface was made out of stainless steel. The condition of the surface was soiled with food debris and grease residue.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.
Observed that the food establishment does not have consistently maintained temperature logs available for TCS foods items. Food Items: Hot and cold held temperature-controlled food items
Activity of the Food: Stored, thawed, cooled□

EDNAS GIBSON MART - 5501 GIBSON BLVD SE - Approved

EDNAS GIBSON MART - 5501 GIBSON BLVD SE
Retail Food Establishment Class 3
Date: 10/28/2026 - #: RT-RET-073422-2025 - Inspection Result: Approved

Violation: Storage

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.
Observed cleaned single-service and single-use articles stored improperly. Single-service and single-use articles was not stored six (6) inches above the floor. Single-service and single-use articles Type: Cups
Storage Method: Directly on the floor Location: Storage room

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.
Observed ambient food temperature measuring devices was not provided or readily accessible for reach in refrigerator holding burritos by fountain drink machine.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at floor drain under 3 compartment sink.

Violation: Operations

• Valid Permit

- General Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.
Observed that the facility was operating with an expired permit.

EINSTEIN BROS BAGELS 3661 - 6231 RIVERSIDE PLAZA LN NW, A - Conditional Approved

EINSTEIN BROS BAGELS 3661 - 6231 RIVERSIDE PLAZA LN NW, A
Food Establishment Class C
Date: 10/27/2026 - #: COM-FOODES-101326-2026 - Inspection Result: Conditional Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Corrective Action: 9. 4-501.114, 4-703.11(C) The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Coffee serving area, food prep area. and Concentration: Both at 100 PPM.
Temperature: 85, 87°F

Violation: Pest Control

• Insect Control Devices, Design and Installation

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.
Observed pests in the facility with no control methods in place. Location: Front serving areas.
Pest Type: fly.
Pest Condition: dead. needing fly lights.

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165°F and to maintain temperature at 135°F and above.
Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Slice ham.
Food Temperature: 104°F

Violation: Time as Public Health Control

• Time as a Public Health Control, Temperature, Disposition

- When Time/Temperature Control for Safety foods are removed from heat or refrigeration and allowed to remain at room temperature, disease-causing organisms, pathogens, multiply more rapidly. In addition to the threat present from the pathogens themselves, some pathogens also produce toxins as they grow. These toxins cannot be removed from the food once they are present. Instructed PIC that in order to minimize the risk of these pathogens when food is removed from cold holding equipment it must have an initial temperature of forty-one (41) °F.
Observed cold food using time as a public health control exceeding the initial temperature of forty-one (41) °F. Location: Coffee dispensing and serving station.
Type of Food: Cremer and Milk
Temperature: was 41°F, 40 °F without a time stamp as to when the creamer and coffee were placed out at room temperature.

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is corrosion-resistant.
Observed nonfood contact surface that was non corrosion resistant. The surface was located Walk in cooler The surface was made out of meatal shelving.
The condition of the surface was rusting legs and shelving.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed doors to the outside that are not tight fitting, light can be seen at the edges. front double door gaps at the bottom and not all the way self-closing.

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.
Observed food temperature measuring devices in the walk-in cooler not recording accurately.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the on the floors under tables, counters, sinks, drains.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located Storage cabinets. prep table bottoms, bagel cases. The surface was made out of wood and stainless metals.
The condition of the surface was soiled with dry buildup and debris.

Violation: Physical Facilities, Construction and Repair

• Floors, Walls and Ceilings-Cleanability

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed Serving areas. in disrepair by
12-15 quarry tiles cracked and not sealed.

El Pollo Loco - 3811 ELLISON DR NW - Conditional Approved

El Pollo Loco - 3811 ELLISON DR NW
Food Establishment Class C
Date: 10/26/2026 - #: RT-FOODEST-100811-2026 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Front service and cook station and back wash areas.
Concentration: tested at 100 ppm.
Temperature: 72, 74,76

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165°F and to maintain temperature at 135°F and above.

Observed time/temperature control for safety food not hot held at 135°F or above.
Food Item: Chopped Hole chicken- 125°F, Whole grilled chicken #1- 124°F, whole grilled Chicken # 2 -123°F, Whole grilled Chicken # 3- 124°F.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Walk in cooler.
Food Items: Diced Serrano peppers, 10/25/26, White chopped onions- no used by date, whole Serrano peppers- no used by dates.

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment not maintained in good repair. Location: Grill area.
Type of Equipment: Mittens.
Condition of the equipment: Excessive grease and soil buildup.

Violation: Plumbing

• System Maintained in Good Repair

- When carbon dioxide is mixed with water, carbonic acid, a weak acid, is formed. Carbonators on soft drink dispensers form such acids as they carbonate the water to be mixed with the syrups to produce the soft drinks. If carbon dioxide backs up into a copper water line, carbonic acid will dissolve some of the copper. The water containing the dissolved copper will subsequently be used in dispensing soft drinks and the first few customers receiving the drinks are likely to suffer with the symptoms of copper poisoning. An air gap or a vented backflow prevention device meeting ASSE Standard No. 1022 will
prevent this occurrence, thereby reducing incidences of copper poisoning. Instructed PIC to immediately discontinue use of equipment and to contact repair personnel to have air gap or vented backflow prevention device repaired or replaced. will need to move and attach to the plumbing to the left side of the wall to be able to discharge to a drain.

Observed air gap or vented backflow prevention device at the carbonator is not properly installed or does not meet requirements
by not over a drain. the 90-degree elbow was set on the quarry tile floor, and liquid was causing standing water on the quarry tile floor.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.

Observed doors to the outside that are not self-closing. front double entry doors.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Chicken cutting area, reheating area.

Activity: Employees handling food with no beard guards.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the on the floors front shelving left hand side and below shelving back storage area. Observed drains under the three-compartment sink with debris and soil buildup,

Family Dollar Stores of New Mexico LLC - 7700 SAGE RD SW - Approved

Family Dollar Stores of New Mexico LLC - 7700 SAGE RD SW
Retail Food Establishment Class 3
Date: 10/28/2026 - #: RT-RET-078388-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: reach in coolers and freezers Location: Retail area Condition of the Location: Debris buildup on the shelfs inside the reach in coolers and freezers throughout the whole facility

Fit & Fabulous Nutrition - 2500 CENTRAL AVE SW, 300 - Approved

Fit & Fabulous Nutrition - 2500 CENTRAL AVE SW, 300
Food Establishment Class C
Date: 10/27/2026 - #: RT-FOODEST-019455-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice Machine Location: prep area Condition of the Location: ice machine has calcium buildup inside ice machine.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap below three compartment sink pvc pipe coming from ice machine.

Fuddruckers - 6600 MENAUL BLVD NE - Approved

Fuddruckers - 6600 MENAUL BLVD NE
Food Establishment Class C
Date: 10/26/2026 - #: COM-FOODES-092730-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless

following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine and dough scale Location: Ice machine next to walk in refrigerator in back of facility. Dough scale inside bread preparation area next to cashier area. Condition of the Location: Substantial debris buildup.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed floor drain at mop sink and under three compartment sink is not maintained in good repair or is not repaired by law. Observed floor drain at mop sink and under three compartment sinks found in disrepair by both missing floor drain cover.

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash, or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.
Observed nonfood contact surface that was not smooth. The surface was located inside cold holding units on main kitchen line The surface was made out of rubber The condition of the surface was torn and damaged refrigeration gaskets on main kitchen line cold holding units.

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did provide a designated area for employees to eat, drink, or use tobacco products however employee drink station was next to kitchen equipment on shelving next to office.

Violation: Operations

• Permit Posted

- Instructed PIC that the permit to operate must be posted in a conspicuous place on the premises of the Food Establishment and made available for examination by the Enforcement Authority. Advised PIC to log into ABQ Plan portal to obtain copy of permit. Also, may contact consumer health at (505) 768-2716 or via email at consumerhealth@cabq.gov.
Observed that no food permit was posted at the facility.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located inside walk in freezer. The surface was made out of metal and plumbing the condition of the surface was substantial ice frost debris buildup on door, shelving, and plumbing inside walk in freezer.

GRANDMAS DINER LLC - 2500 BROADWAY BLVD SE - Approved

GRANDMAS DINER LLC - 2500 BROADWAY BLVD SE
Food Establishment Class C
Date: 10/30/2026 - #: RT-FOODEST-008236-2026 - Inspection Result: Approved

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.
Observed equipment not maintained in good repair. Location: Clean dish storage rack
Type of Equipment: Food storage container and dicer catch tray Condition of the equipment: Broken and damaged
Person in charge discarded both items during the inspection.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.
Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Bulk food storage
Location: Dry storage room

HOLIDAY INN EXPRESS - 2300 12TH ST NW - Approved

HOLIDAY INN EXPRESS - 2300 12TH ST NW
Food Establishment Class B
Date: 10/30/2026 - #: RT-FOODEST-023416-2025 - Inspection Result: Approved

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no/expired testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Handling ready to eat food Inappropriate Jewelry Observed: Wrist watch

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Food prep area
Activity: Handling ready to eat food

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.
Observed that the facility was operating with an expired permit.

• Sticker Posted

- Instructed the PIC that every Food Establishment must display the Grade received at the time of the most recent inspection in a place that is visible to the public.
Observed that no grade sticker was posted on the facility.

• Permit Posted

- Instructed PIC that the permit to operate must be posted in a conspicuous place on the premises of the Food Establishment and made available for examination by the Enforcement Authority. Provided a copy of the valid permit for posting.
Observed that no food permit was posted at the facility.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items and thermometer calibration logs Food Items: Milk
Activity of the Food: Stored

Date: 10/27/2026 - #: RT-FOODEST-010213-2026 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule

and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can opener Location: Back prep table.
Condition of the equipment: old food residue on the blade and holder.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing inappropriate date markings.
Observed ready-to-eat time and temperature controlled for safety food held within the establishment inappropriately marked. Location: upright refrigerator. Food Items: two units of queso cheese, squeeze bottle if pizza sauce were inappropriately date marked
Manner: no dates as to when the food items expire.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed Sink PVC drain is not maintained in good repair or is not repaired by law.
Observed End of the PVC drain line does not have a 90-degree elbow facing towards the bottom of the floor drain which is causing gray water splatter onto the floor in front of the drain and under the three compartments sink.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels
(B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.
Observed no approved method of hand drying at handwashing sink(s). Location: Back and front hand wash stations.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: cooking areas.
Activity: Employee handling a ready to eat Pizza with no hair restraint.

Violation: Outside Storage Prohibitions

• Outside Storage Prohibitions

- Waste that is not in a rodent or insect resistant bin must not be stored outside; unless it is cardboard or other recyclables that do not contain food residue and is awaiting regularly scheduled pick-up. Instructed PIC to designate an area indoors for waste that does not fit in the outdoor enclosures or to place proper waste storage bins outside. areas must be cleaned on a regular basis.
Observed that waste was being improperly stored outside. Location of the waste: east area of the parking lot.
Type of items: Trash and Cardboard.
Storage method: Trash and cardboard stored outside of the trash bin.
Overall condition of the items Debris trash and cardboard scattered all throughout the trash corral with excessive flies.

Violation: Hot & Cold-Water Availability & Pressure

• Water System-Distribution, Delivery, and Retention

- Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during peak water usage periods.
Observed facility with insufficient hot water. Location: Front hand wash station.
Manner: hot water reached a temperature of 70°F.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors under the three compartment sinks under prep tables, storage racks, cooler and freezer floors. observed walls above the three compartment sinks with substantial soil buildup.

MAHARAJA INDIAN CUISINE - 4900 LOMAS BLVD NE - Approved

MAHARAJA INDIAN CUISINE - 4900 LOMAS BLVD NE
Food Establishment Class C
Date: 10/28/2026 - #: PT0161484 - Inspection Result: Approved

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165°F and to maintain temperature at 135°F and above.
Violation corrected on site by PIC reheating meatballs to 165°F
Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Cooked meatballs
Food Temperature: 121°F

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Walk in cooler
Food Items: Cooked chicken Expiration Dates: No dates available

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Working cook line Inappropriate Jewelry Observed: Wrist watch

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Cook line
Activity: Working cook line

El Branco Restaurant - 100 Coors AVE SW - Unsatisfactory Re-Inspection required

El Branco Restaurant - 100 Coors AVE SW
Food Establishment Class C
Date: 10/30/2026 - #: RT-FOODEST-086384-2025 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

-The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F.
Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. no sanitation made at time of inspection pic presented a bottle stating it was sanitation but when testes the bottle tested at 0ppm
had pic make a bucket of chlorine sanitation that tested at 100ppm at 70 °F

Violation: Date Marking and Disposition

• Date Marking Altered or Concealed

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: kitchen and front area Food Items: no foods were date marked inside the kitchen or front area

Violation: Cooling

• Cooling

- Instructed PIC to rapidly reheat the (TCS) food item to 165°F; then, quickly cool the product down to 70°F within two (2) hour period using method(s) such as 1) Place the food in a shallow pan 2) Separate the food into smaller or thinner portions 3) Use rapid cooling equipment 4) Stir the food in a container placed in an ice/water bath 5) Use containers that facilitate heat transfer 6) Only partially cover product, if protected from overhead contamination.
Observed cooling TCS food items fail to reach seventy (70) °F within two (2) hour period. Location: kitchen area Food Items: green chile and menudo Temperature: menudo 105 f* green chile 107 f* Time transpired: hour and a half
inspector had them reheat the food to above 165 °F* and start process of cooling over again

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.
Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping. Location: kitchen and front area Food Item: Red Chile, Green Chile, Carne Rojo

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

-Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed testing kit with no expiration or levels to match concentration with test strip once sanitation is tested or other device to measure the concentration of chemical sanitizing solution.

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purposes such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purposes other than handwashing.
Observed handwashing sink used for purposes other than handwashing. Location: Kitchen Area Manner: plate being stored inside handwashing sink

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: cook line Activity: cooking food

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors in the kitchen and dishwashing areas.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. no Hot Holding, Cold Holding, Cooling, Equipment or calibration logs were presented to the inspector at the time of the inspection

MAVERIK COUNTRY STORE #621 - 650 JUAN TABO BLVD NE - Approved

MAVERIK COUNTRY STORE #621 - 650 JUAN TABO BLVD NE
Food Establishment Class C
Date: 10/28/2026 - #: RT-FOODEST-073722-2025 - Inspection Result: Approved

Violation: Pest Control

• Insect Control Devices, Design and Installation

- Exposed food and food-contact surfaces must be protected from contamination by insects or insect parts. Installation of the device over food preparation areas or in close proximity to exposed food and/or food-contact surfaces could allow dead insects and/or insect parts to be impelled by the electric charge, fall, or be blown from the device onto food or food-contact surfaces. Insect control devices are not allowed to be installed above food preparation areas.
Instructed PIC to move the device and to clean and sanitize the food preparation area that was under the device.
Observed insect control device installed over a food preparation area. Location: By walk in door directly above prep table Type of Device: electrocution

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the

system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at floor drain under 3 compartment sink

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Food must be protected from contamination of splashing water, chemical, or other foods; dust; and other contaminates. Instructed PIC to have food protected in containers/wrapping and not to store food in those areas unless the source of contamination can be mediated another way.
Observed food stored improperly where it was exposed to contamination from splash, dust, or other contamination. Location: Prep table by walk in cooler Food Item: Cookies Condition: cookies not covered and stored directly under pest control device

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: main cook line in bonfire grill Activity: Actively working with open food items

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris in the floor drain under the dump sink

MAVERIK COUNTRY STORE #621 - 650 JUAN TABO BLVD NE
Retail Food Establishment Class 3
Date: 10/28/2026 - #: RT-RET-073717-2025 - Inspection Result: Approved

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located cabinets around drink station and hot dog rollers The surface was made out of Sealed wood The condition of the surface was Debris buildup inside cabinets

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris in the floor drain under handwashing sink next to soda machine

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165°F and to maintain temperature at 135°F and above.
Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Hot Dogs
Food Temperature: 117°F, 96°F

NAAN & DOSA - 6501 WYOMING BLVD NE, B - Approved

NAAN & DOSA - 6501 WYOMING BLVD NE, B
Food Establishment Class C
Date: 10/28/2026 - #: CAC-Food-102040-2026 - Inspection Result: Approved

Corrective action taken after the routine inspection resulted in the facility being upgraded from a Conditional Approved Status to Approved Status. The person in charge addressed and corrected one of the priority foundation violations noted in the inspection report and has sent CHPD inspector verification information in

the form of photo showing violation correction. As a result of the correction, the inspection score improved to Approved. The following priority foundation violation was corrected:
- Sanitizing Solutions, Testing Devices. Observed PIC obtained required test strips.

NAAN & DOSA - 6501 WYOMING BLVD NE, B
Food Establishment Class C
Date: 10/27/2026 - #: RT-FOODEST-101632-2026 - Inspection Result: Conditional Approved

Violation: Knowledgeable

• Knowledgeable Person In Charge

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.
Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances by receiving multiple priority violations during inspection.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed food employees without proper facial hair restraints. Location: kitchen area. Activity: preparing food items and working in warewashing area.

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.
Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

NAAN & DOSA - 6501 WYOMING BLVD NE, B
Food Establishment Class C
Date: 10/27/2026 - #: PT0156723 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds. Observed PIC contact repair personnel during inspection. Repair personnel stated that they are in route to facility.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: wiping cloth container and dispenser. Concentration: 0ppm

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact

surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine and Can opener. Location: Kitchen area. Condition of the Location: Ice machine: buildup and debris on the interior surface of the ice machine. Can opener: buildup and debris on the can opener blade.

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165°F and to maintain temperature at 135°F and above.
Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Tandoori Chicken.
Food Temperature:115°F.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. Observed PIC re-educate employees during inspection.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators or inconsistent use of date marking indicators. Location: Walk in cooler. Food Items: various sauces and dishes. Expiration Dates: no date marking on some containers but date marking on others.

Violation: Consumer Self-Service Operations

• Food Display-Preventing Contamination by Consumers

- During display, food can be contaminated even when there is no direct hand contact. Many microbes can be conveyed considerable distances on air currents through fine sprays or aerosols. These may originate from people breathing or sneezing, water sprays directed at drains, or condensate from air conditioners. Except for shelled nuts or raw uncut fruits and vegetables food on display shall be protected from contamination by the use of packaging; counter, service line, or salad bar food guards; display cases; or other effective means
Observed food on display that was not protected from contamination by the environment or potential consumers. Location: Middle customer self-service buffet bar area. Food Item: various dishes such as Chana Saaga Condition: no food guard or barrier installed/used.

Violation: Knowledgeable

• Knowledgeable Person In Charge

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.
Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances by receiving multiple priority violations during inspection.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed

food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed food employees without proper facial hair restraints. Location: kitchen area. Activity: preparing food items and working in warewashing area.

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.
Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

ODELIA HEALTHCARE LLC - 1509 UNIVERSITY BLVD NE - Approved

ODELIA HEALTHCARE LLC - 1509 UNIVERSITY BLVD NE
Food Establishment Class C
Date: 10/29/2026 - #: COM-FOODES-102276-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

RED ROOF INN - 2015 MENAUL BLVD NE - Closure Re-Inspection Required

RED ROOF INN - 2015 MENAUL BLVD NE
Food Establishment Class B
Date: 10/28/2026 - #: RT-FOODEST-075528-2025 - Inspection Result: Closure Re-Inspection Required

Violation: Knowledgeable

• Knowledgeable Person In Charge

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.
Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances.
Knowledge Tested: PIC did not know proper cold holding temperatures and hot holding temperatures. CHPD inspector asked what type of sanitizer the facility utilizes PIC stated he did not know.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- To prevent cross contamination of pathogens and/or allergens, raw animal foods of different types must be separated during storage, preparation, holding, and display by use of separate equipment, arranging food items by cooking temperature requirements, and preparing food at different times or in different areas.
Observed raw animal foods of different types stored improperly. Location: Upright cooler
Food Item: Raw shelled eggs
Condition: Raw shelled eggs stored over ready to eat items (muffins)

Violation: Availability

• Cleaning Agents and Sanitizers, Availability

- PIC was instructed to obtain a food safe sanitizer such as Quat or Chlorine
Facility had no sanitizer available in the facility to clean and sanitize food prep areas and utensils.

Violation: Physical Facilities

• Outer Openings, Protected

- Walls and roofs provide a barrier to protect the interior and foods from the weather, windblown dirt and debris, and flying insects. Perimeter walls and roofs of a food establishment shall effectively protect the establishment from the weather and the entry of insects, rodents, and other animals.
Observed doors to the outside that are not tight fitting, light can be seen at the edges.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Cold holding unit in continental breakfast area
Food Items: Milk Temperature: 52°F

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.
Observed no handwashing cleanser available at handwashing sink(s). Location: Hand wash station located in back of house and hand wash station near coffee make station

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels
(B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.
Observed no approved method of hand drying at handwashing sink(s). Location: Hand wash station located in back of house and hand wash station near coffee make station

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.
Observed handwashing sink(s) without a handwashing sign.
Location: Hand wash station located in back of house and hand wash station near coffee make station

Violation: Functionality and Accuracy

• Temperature Measuring Devices, Ambient Air and Water-Accuracy

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to move temperature measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures.
Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: Continental breakfast area upright cooler
Thermometer Location: Stored in back of cold holding unit.

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Handling ready to eat food item like muffins and bagels
Inappropriate Jewelry Observed: Wrist watch

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Food prep area
Activity: Handling ready to eat food item like muffins and bagels

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee not wash hands when required.
Condition: Donning new gloves and switching tasks. PIC was observed handling medication and donning new gloves without cleaning and sanitizing hands.

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.
Observed a soiled mop not in use, stored directly on the floor.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs or thermometer calibration logs available for TCS foods items. Food Items: Milk Activity of the Food: Stored

RIG-CAFFEINE & GASOLINE GARAGE - 3732 EUBANK BLVD NE - Approved

RIG-CAFFEINE & GASOLINE GARAGE - 3732 EUBANK BLVD NE
Food Establishment Class C
Date: 10/29/2026 - #: PT0156345 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: behind front counter Condition of the Location: Buildup on inside of ice machine

Violation: Operation and Maintenance

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.
Observed handwashing sink(s) without a handwashing sign. Location: Bathroom

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: behind front counter Activity: Actively working with open food items

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under □□ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Paper cup Location: Coffee bins Condition of the Location: Paper cup used as scoop and stored with the food product directly touching the coffee beans

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located inside the upright and undercounter coolers The condition of the surface was Frost and ice buildup

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: stored Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

RIO GRANDE SOCIAL - 10127 COORS BLVD NW
Food Establishment Class C
Date: 10/28/2026 - #: PT0160406 - Inspection Result: Approved

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Walk in coolers and refrigerators.
Food Items: Cut Celery, Mash Potato's, Cajun sauce, cut eggplant, Ready eat noodles.

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.
Observed nonfood contact surface that was not smooth. The surface was located Refrigerator.
The surface was made out of rubber gaskets
The condition of the surface was damaged and in need of replacement.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Prep top cooler.
Food Items: Butter-47°F, Vinaigrette onions- 44°F, Green Salsa-47°F, Egg Plant Pattie-46°F, Country fried Patties-48°F, Spice Meat Balls-46°F

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.
Observed handwashing sink(s) was observed blocked or inaccessible. Location: Back Hand wash sink. Manner: Dough containers stored in front of the hand wash sink.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris
Observed buildup and debris on the under the storage shelving and prep tables.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located Kitchen shelving. The surface was made out of Meatal.
The condition of the surface was debris and soil buildup on shelving.

RIO GRANDE SOCIAL - 10127 COORS BLVD NW
Food Establishment Class B
Date: 10/28/2026 - #: PT0160407 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: bar.
Concentration: No sanitizer made up at the time of inspection.

SANDIA BAPTIST CHURCH - 9429 CONSTITUTION AVE NE - Approved

SANDIA BAPTIST CHURCH - 9429 CONSTITUTION AVE NE
Food Establishment Class C
Date: 10/28/2026 - #: RT-FOODEST-008592-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: Inside main kitchen line Condition of the Location: Debris buildup

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Sandia Prep School - 532 OSUNA RD NE - Approved

Sandia Prep School - 532 OSUNA RD NE
Food Establishment Class C
Date: 10/27/2026 - #: PT0142548 - Inspection Result: Approved

Violation: Date Marking and Disposition

• Date Marking Altered or Concealed

- Refrigeration helps prevents food from becoming a hazard by significantly slowing the growth of most microbes, but not stopped. Over a period of time, organisms may increase their risk to public health in ready-to-eat foods. Time/temperature control for safety refrigerated foods must be consumed, sold or discarded by the expiration date therefore must not be altered or concealed. Instructed PIC to retrain food employees on ensuring the proper dating and disposition of food items.
Observed PIC remove container of rice and dispose of during inspection.
Observed dating information on foods concealed, mislabeled or altered. Food: cooked basmati rice Location: in a container on the shelf in the walk-in cooler Condition: Observed label with date of 10-15-26. PIC stated that it was mislabeled and was from earlier this week.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Lighting

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.
Observed inadequate amount of lighting. Location: Hood ventilation system lights. Manner: light bulb burned out on far west end of hood system.

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.
Observed that the facility was operating with an expired permit.

SANDIA RIDGE CENTER - 2216 LESTER DR - Approved

SANDIA RIDGE CENTER - 2216 LESTER DR
Food Establishment Class C
Date: 10/26/2026 - #: RT-FOODEST-081574-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Red sanitizer bucket Concentration: 300 ppm Temperature: 69 °F

Violation: Toilet Facilities

• Toilet Room Receptacle, Covered

- Instructed to provide a covered receptacle for sanitary napkins.
Observed in a toilet room used by females, no covered receptacle.

Violation: Operations

• Sticker Posted

- Instructed the PIC that every Food Establishment must display the Grade received at the time of the most recent inspection in a place that is visible to the public.
Observed that no grade sticker was posted on the facility.

Violation: Hot & Cold-Water Availability & Pressure

• Water Capacity-Quantity and Availability

- Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during peak water usage periods.
Observed facility with insufficient hot water. Location: Hand washing sink inside main kitchen Manner: Hot water was only able to reach 77 °F. Must reach a minimum of 85 °F.

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air dry.
Observed a soiled mop not in use, stored directly inside mop bucket.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located inside main kitchen line The surface was made out of plastic The condition of the surface was storage bins used to store utensils and kitchen equipment with food debris buildup. Blender base stored away with debris buildup. Also, clean lexans, food containers and pitchers stored away in clean dish area with previously used date marking still on containers.

SANDIA SKIES TRADING COMPANY LLC - 2101 LOUISIANA NE - Approved

SANDIA SKIES TRADING COMPANY LLC - 2101 LOUISIANA NE
Retail Food Establishment Class 3
Date: 10/28/2026 - #: PT0146289 - Inspection Result: Approved

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.
Observed food stored improperly less than six (6) inches off the floor. Location: Stored on the floor in front of the cooler Food Item: Botted and canned beverages

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided PIC with invoice to pay permit immediately.
Observed that the facility was operating with an expired permit.

• Sticker Posted

- Instructed the PIC that every Food Establishment must display the Grade received at the time of the most recent inspection in a place that is visible to the public.
Observed that no grade sticker was posted on the facility.

SHWAN 3 - 2124 SAN MATEO BLVD NE - Approved

SHWAN 3 - 2124 SAN MATEO BLVD NE
Retail Food Establishment Class 3
Date: 10/28/2026 - #: COM-RET-102060-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.
Observed no approved method of hand drying at handwashing sink(s). Location: Hand wash station near soda dispensing unit

ST MICHAELS & ALL ANGELS CHURCH - 601 MONTANO RD NW - Approved

ST MICHAELS & ALL ANGELS CHURCH - 601 MONTANO RD NW
Food Establishment Class C
Date: 10/28/2026 - #: PT0155141 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for sanitizer utilized it must be at the manufacturer specified concentration and temperature range with a contact time of 30 seconds.
Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Kitchen. no sanitizer was made to wipe and spray down food contact surfaces.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff. Also missing the required food handlers for employees who are handling food

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.
Observed nonfood contact surface that was not smooth. The surface was located Kitchen.
The surface was made out of compact wood. The condition of the surface was damaged by liquid and warped.
cabinet door surfaces also are not smooth and easily cleanable.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

STRIPES BURRITO LLC - 2204 MENAUL BLVD NE - Approved

STRIPES BURRITO LLC - 2204 MENAUL BLVD NE
Food Establishment Class C
Date: 10/27/2026 - #: CAC-Food-101473-2026 - Inspection Result: Approved

Inspection resulted in a Conditional Approved status. No yellow sticker was placed on facility due to PIC correcting enough violations to bring score back into an Approved status. PIC was issued a Corrective Action Compliance Report for violations corrected on site. Facility was issued a civil citation for having pooled eggs available in the facility at the time of inspection.
Corrected violations:
1. Eggs Pasteurization and Prohibition: Pooled Eggs Prohibition
2.Hot Holding & Reheating: Time/Temperature Control for Safety Food, Hot Holding
3. Prevention of Food Contamination: Miscellaneous Sources of Contamination

STRIPES BURRITO LLC - 2204 MENAUL BLVD NE
Food Establishment Class C
Date: 10/27/2026 - #: RT-FOODEST-010039-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine
Location: Back of house
Condition of the Location: Observed orange organic matter buildup near ice chute

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165°F and to maintain temperature at 135°F and above.
Violation corrected on site by PIC discarding out of temp food item

Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Cooked chicken breast
Food Temperature: 122°F

Violation: Pooled Eggs

• Pooled Eggs Prohibition

- Raw eggs may only be combined in the amount and in response to a customer's order, or for the preparation of a batter to be cooked immediately. Instructed the PIC that the identified pooled eggs must not be used in further food preparation and that raw eggs shall only be combined for batters or in response to a customer's order.
Violation corrected on site by PIC discarding pooled eggs
Observed pooled eggs in the food establishment that were not being combined for a customer's order or for a batter. Location: One jug stored in porting pan. Two jugs stored in prep top cooler. 16 jugs stored in upright cooler
Number of eggs combined: Number of eggs unknown 19 jugs of pooled eggs observed

Violation: Miscellaneous

• Miscellaneous Sources of Contamination

- Regardless of its specificity, a Code cannot anticipate all the diverse means by which food can become contaminated after receipt. Food must be protected from all sources of contamination.

Violation corrected on site by PIC discarding food item Method of contamination: Improper thawing
Food that was contaminated: Chicken
Location: Three compartment sink observed with dirty utensils

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.
Observed a soiled mop not in use, stored directly in mop bucket.

STUFYS DRIVE THRU - 1107 CANDELARIA RD NW - Conditional Approved

STUFYS DRIVE THRU - 1107 CANDELARIA RD NW
Food Establishment Class C
Date: 10/29/2026 - #: RT-FOODEST-097665-2025 - Inspection Result: Conditional Approved

Violation: Pooled Eggs

• Pooled Eggs Prohibition

- Raw eggs may only be combined in the amount and in response to a customer's order, or for the preparation of a batter to be cooked immediately. Instructed the PIC that the identified pooled eggs must not be used in further food preparation and that raw eggs shall only be combined for batters or in response to a customer's order.
Observed pooled eggs in the food establishment that were not being combined for a customer's order or for a batter. Location: Ice bath on a prep table.
Number of eggs combined: 10 to 12 eggs.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Reach in refrigerator, walk in cooler.
Food Items: Salsa, Cooked chicken, Carne adovada.
Expiration Dates: were not dated and the carne adovada was dated a used by date of 10/28, should have been the starting dates.

Violation: Training Records

• Certified Food Protection Manager

- Observed that the food establishment does not have a certified food protection manager on staff. Correct By Date: 11/16/26
Code: 2-102.12(A), CABQ Rules 15-A - Certified Food Protection Manager

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.
Observed nonfood contact surface that was not smooth. The surface was located Kitchen.
The surface was made out of Rubber gaskets The condition of the damaged and not intact.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

Observed handwashing sink(s) was observed blocked or inaccessible. Location: Kitchen sink. Manner: Mop and mop bucket stored in front of the hand wash station

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the ceiling tiles in kitchen, floors under sinks and storage racks with debris and soil buildup.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located Kitchen The surface was made out of Stainless steel.
The condition of the surface exterior of the fryer with substantial soil and grease buildup.

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctures, Coved, and Enclosed or Sealed

- Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to remove and replace with material that is smooth and easily cleanable.
Observed Corner of the wall by receiving door, ceiling is not smooth and easily cleanable
. The surface was located Back storage room.
The surface was made out of Dry wall and ceiling tiles.

SUSHI XUAN - 417 TRAMWAY BLVD NE, 3 - Approved

SUSHI XUAN - 417 TRAMWAY BLVD NE, 3
Food Establishment Class D
Date: 10/28/2026 - #: CAC-Food-101613-2026 - Inspection Result: Approved

Time/Temperature Control for Safety Food, Cold Holding-PIC corrected violation by discarding food.

Temperature Logs-PIC filled out Hot Holding forms.

SUSHI XUAN - 417 TRAMWAY BLVD NE, 3
Food Establishment Class D
Date: 10/27/2026 - #: COM-FOODES-101551-2026 - Inspection Result: Conditional Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Mandolin Slicer Location: Kitchen prep area Condition of the Location: Dried food debris buildup in blade of slicer

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators.
Location: Upright cooler and prep top cooler Food Items: Multiple items including Tempura chicken, tempura batter, Vegetables, Expiration Dates: No dates

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed

PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
Observed interior intake and exhaust air ducts with debris buildup. Location: Kitchen area

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Prep top cooler and on shelf Food Items: Sliced Onion 57 degrees

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Operation and Maintenance

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.
Observed handwashing sink(s) without a handwashing sign. Location: The handwashing sink in far bathroom.

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: Wrist jewelry

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Kitchen main line and prep area Activity: Actively working with open food items

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors, walls and ceilings in kitchen area with substantial debris buildup under wok station

Violation: Storage

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: Not air dried and stacked wet with water in between pans

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located On the equipment The condition of the surface was heavy debris buildup and substantial debris buildup on sides of fryers and wok station

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: Stored Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and

contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

TACO BELL 2926 - 4901 GIBSON BLVD SE - Approved

TACO BELL 2926 - 4901 GIBSON BLVD SE
Food Establishment Class C
Date: 10/27/2026 - #: CAC-Food-101484-2026 - Inspection Result: Approved

Facility has been upgraded to green approved status following the correction of the following violations during inspection by the Environmental Health Department.
The facility has corrected:

- Using a Handwashing Sink-Operation and Maintenance (Facility removed the improperly stored items out of the sink basin)

TACO BELL 2926 - 4901 GIBSON BLVD SE
Food Establishment Class C
Date: 10/27/2026 - #: RT-FOODEST-002821-2025 - Inspection Result: Conditional Approved

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at floor drain under the drive through fountain drink machine.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.
Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Bulk food storage
Location: Kitchen bulk food storage containers

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed rear receiving door to the outside that is not tight fitting, light can be seen at the edges.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Walk in refrigerator
Food Items: Cooked chicken (46°F), Pico de gallo (48°F), Sliced cheese (46°F)

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.
Observed insufficient cold holding equipment to properly hold food cold. Location: Walk in refrigerator
Condition: Condenser is freezing over and not allowing middle fan to spin. The condenser in unable to hold temperature at 41°F or below as required.

Violation: Designated Areas

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.
Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purposes such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purposes other than handwashing.

Observed handwashing sink used for purposes other than handwashing. Location: Kitchen handwashing station Manner: Had scrubbing pad and detergent stored inside the sink basin

Violation: Personal Cleanliness

• Eating, Drinking, or Using Tobacco Products

- Eating by employees in food preparation areas is prohibited because of the potential that the hands, food, and food-contact surfaces may become contaminated. Instructed PIC to retrain employees on designated eating areas.
Observed employee eating in an undesignated area. Proper hygienic practices must be followed by food employees in performing assigned duties to ensure the safety of the food, prevent the introduction of foreign objects into the food, and minimize the possibility of transmitting disease through food. Location: Kitchen Activity: Actively eating in kitchen above food prep areas

Violation: Storage

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.
Observed cleaned single-service and single-use articles stored improperly. Single-service and single-use articles was not stored six (6) inches above the floor. Single-service and single-use articles Type: Packaging materials
Storage Method: Directly on the floor Location: Dry storage

TOMASITAS - 4949 PAN AMERICAN FWY NE - Approved

TOMASITAS - 4949 PAN AMERICAN FWY NE
Food Establishment Class C
Date: 10/26/2026 - #: RT-FOODEST-016214-2026 - Inspection Result: Approved

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.
Observed pests allowed to accumulate in traps.
Location: Ware wash area, dry storage room, and beverage station Pest Type: Cockroach
Pest Condition: One living and 15 plus dead
Number of Pests Present: 15 plus dead throughout facility

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located throughout kitchen and storage areas
The surface was made out of stainless steel, plastic, and metal
The condition of the surface was dirty with extreme food debris and grease buildup.

TWIN DRAGONS INC - 1425 JUAN TABO BLVD NE - Approved

TWIN DRAGONS INC - 1425 JUAN TABO BLVD NE
Food Establishment Class C
Date: 10/26/2026 - #: CAC-Food-101122-2026 - Inspection Result: Approved

Common Name-Working Containers- PIC corrected violation by labeling all chemicals Time/Temperature Control for Safety Food, Hot Holding- PIC corrected violation by reheating to 165°F

TWIN DRAGONS INC - 1425 JUAN TABO BLVD NE
Food Establishment Class C
Date: 10/26/2026 - #: PT0044348 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: Back kitchen Condition of the Location: Yellow and brown buildup on inside of ice machine around ice chute

Violation: Poisonous and Toxic/Chemical Substances

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.
Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottle Alleged Material: Degreaser

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165°F and to maintain temperature at 135°F and above.
Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: steamed Broccoli
Food Temperature: 121°F

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
Observed interior intake and exhaust air ducts with debris buildup. Location: Kitchen area

Violation: Maintenance

• Maintaining Premises, Unnecessary Items and Litter

- The presence of unnecessary articles, including equipment which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.
Observed items on the premises of the food establishment that is no longer used or is non-functional. Location: kitchen area and boiler area Items list: Unused kitchen equipment Condition of the items: non-functional, dirty

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Operation and Maintenance

• Cleaning of Handwashing Fixtures

- Handwashing facilities are critical to food protection and must be maintained in operating order at all times so they will be used. Handwashing sinks shall be cleaned as often as necessary to keep them clean. Instructed PIC to clean handwashing sink(s).
Observed handwashing fixtures with the buildup of soil residues. The plumbing fixture was located Back kitchen hand washing sink soap dispenser The condition of the surface was soap dispenser barely working due to clogged up soap in dispenser

Violation: Lighting

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.
Observed inadequate amount of lighting. Location: Walk in cooler Manner: lighting very dim and not sufficient to safely conduct general food establishment operations and clean-up.

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: wrist jewelry

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food;

clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Main cook line kitchen Activity: Actively working with open food items

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.
Observed a soiled mop not in use, stored in mop strainer which does not promote air drying

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors in the hand to reach areas (Corners and under equipment) with Substantial grease and carbon buildup under grill area which can be a fire hazard

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.
Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
1. Observed nonfood contact surface with the buildup of soil residues. The surface was located on the faucet sprayer for the three compartment sink The condition of the surface was heavy grease and soil debris accumulation on sprayer and hose
2. Observed nonfood contact surface with the buildup of soil residues. The surface was located fan shrouds in the walk-in cooler The condition of the surface was dust and soil debris buildup

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
1. Observed the following areas of the facility in disrepair. Observed facility walls in disrepair by numerous small holes is walls throughout kitchen area
2. Observed the following areas of the facility in disrepair. Observed facility wall in disrepair by FRP bowing and coming off wall in dry storage area

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: Stored Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

Food Establishment Class C
Date: 10/27/2026 - #: PT0150777 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer

to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Ice Machine and Can Opener Location: Inside Ice Bin, Prep area Condition of the Location: Organic Matter Buildup

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
Observed interior intake and exhaust air ducts with debris buildup. Location: In dish area

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.
Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under □□ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Measuring Spoon Location: In container with baking soda Condition of the Location: Spoon was touching food

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed equipment was not air dried and was wet stacked. Location: Dish Area Equipment Type: Cambro containers Manner: Stacked wet without air drying

Violation: Single-Service

• Single-Service and Single-Use Articles-Use Limitations

- Single-service and single-use articles may not be reused. Articles that are not constructed of multiuse materials may not be reused as they are unable to withstand the rigors of multiple uses, including the ability to be subjected to repeated washing, rinsing, and sanitizing. Instructed PIC that all single-service and single-use articles being reused must be replaced with multiuse containers and/articles.
Observed single-use containers being re-used. Location: Dry Storage and Walk-in Use: Old containers being used for new prepped item holding

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctures, Coved, and Enclosed or Sealed

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
Observed the following areas of the facility in disrepair. Observed Floor coving in disrepair by broken and damaged
