Consumer Health Protection Inspections Performed
2/24/2025-2/28/2025
Report Amended on **3/5/2025** for clerical errors

1ST CLASS LEARNING CENTER - 1ST CLASS LEARNING CENTER - 5111 HOMESTEAD CIR NW - Current Status: Approved

1ST CLASS LEARNING CENTER - 5111 HOMESTEAD CIR NW
Food Establishment Class C - 1ST CLASS LEARNING CENTER
Inspection Date: 2/26/2025 Inspection #: PT0152357 Inspection Result: Approved

Violation: Designated Areas

- Designated Areas-Employee Accommodations for eating/drinking/smoking

  - Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

    Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Ventilation and Hood Systems

- Ventilation Hood Systems, Filters

  - Ventilation hood systems and devices must be sufficient in number and capacity to
  and designed to prevent dust, grease or condensation from collecting, draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to clean and sanitize ventilation hood system to prevent contamination of food or food contact surfaces.

  Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur. Condition: Had excessive dust and soil accumulation at the time of inspection.

Violation: Hot & Cold Water Availability & Pressure

- Water System-Distribution, Delivery, and Retention

  - Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during peak water usage periods.

  Observed facility with insufficient hot water.
  Location: Kitchen handwashing sink
  Manner: Not available as required (Hot water was available in 3 compartment sink)

Violation: Surface Not Clean

- Nonfood Contact Surfaces - Cleaning Frequency

  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

  Observed nonfood contact surface with the build up of soil residues.
  The surface was storage cabinets, drawers and reach in coolers
  The surface was made out of wood and plastic
  The condition of the surface was soiled with food residue and soil accumulation

Violation: Training Records

- Food Handler Cards

  - Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

  Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

  - Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

  Observed utensil food-contact surface with the build up of soil residues.
  Utensil Type: Multiple utensils such as serving spoons, dough roller, ice cream scoops, measuring cups, can opener blade / holder, shams and liners inside drawers.
  Location: Clean dish storage drawers
  Condition of the Location: Utensils and storage drawers had debris accumulation

ALBUQ GRAND SENIOR APTS - ALBUQ GRAND SENIOR APTS - 1501 TIJERAS AVE NE - Current Status: Approved

ALBUQ GRAND SENIOR APTS - 1501 TIJERAS AVE NE
Food Establishment Class C - ALBUQ GRAND SENIOR APTS
Inspection Date: 2/24/2025 Inspection #: PT0043786 Inspection Result: Approved

Violation: Designated Areas

- Designation-Dressing Areas and Lockers

  - Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as Phones, purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

  Observed: Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

- Designated Areas-Employee Accommodations for eating/drinking/smoking

  - Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

  Observed: Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions

  - Observed: Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris and to clean and sanitize above dish washing machine.

  Observed: Observed build up and debris on the ceiling and cover above the dishwashing machine.

Violation: Plumbing

- System Maintained in Good Repair, Repaired According to Law

  - Observed faucet on three compartment sink is not maintained in good repair or is not repaired by law. Observed faucet on three compartment sink found in disrepair by leaking.

  Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Violation: Knowledgeable

- Knowledgeable Person In Charge

  - A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

  Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances. Knowledge Tested: Tested manager with questions what are the six reportable food bourne illnesses pic only could remember salmonella, i also asked the question what hot holding food should be held at and pic did not know answer of 135 degrees f.

BOBS BURGERS #8 - BOBS BURGERS - 1945 JUAN TABO BLVD NE - Current Status: Approved

BOBS BURGERS #8 - 1945 JUAN TABO BLVD NE
Food Establishment Class C - BOBS BURGERS
Inspection Date: 2/27/2025 Inspection #: PT0151527 Inspection Result: Approved

Violation: Physical Facilities, Construction and Repair

- Floor and Wall Junctures, Coved, and Enclosed or Sealed

  - When cleaning is accomplished by spraying or flushing, coving and sealing of the floor/wall junctures is required to provide a surface that is conducive to water flushing. Grading of the floor to drain allows liquid wastes to be quickly carried away, thereby preventing pooling which could attract pests such as insects and rodents or contribute to problems with certain pathogens such as Listeria monocytogenes. Instructed PIC to contact repair personnel to have wall juncture reattached/sealed to wall.

  Observed floor and wall juncture covering coming off the wall behind the wheeled bread rack at the time of inspection.

Violation: Plumbing

- System Maintained in Good Repair

  - Observed toilet tank lid in women's restroom is not maintained in good repair or is not repaired by law. Observed toilet tank lid found in disrepair by observing a large crack in it at the time of inspection

  Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of equipment which depends on sufficient volume and pressure to perform its intended functions. Instructed PIC to replace toilet tank lid.

BRILLANTE EARLY LEARNING CENTER - 1701 MOUNTAIN RD NW
Food Establishment Class B - BRILLANTE EARLY LEARNING CENTER
Inspection Date: 2/26/2025 Inspection #: PT0159844 Inspection Result: Approved

Violation: Surface Not Clean

- Nonfood Contact Surfaces - Cleaning Frequency

  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed pic refrigerator and interior of the oven must be cleaned by the end of the business day.
  Observed nonfood contact surface with the buildup of soil residues. The surface was located Kitchen area The surface was made out synthetic and oven made out of metal the surfaces had dry caked on soil residue at the time of inspection.

Violation: Warewashing Temperature and Concentration

- Sanitizers, Criteria-Chemicals

  - The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 25-49ppm must also be at a minimum temperature of 120F with a contact time of 10 seconds. PIC corrected violation by PIC remaking Sanitizer concentration to 50 ppm at 61 degrees f.

  Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Spray Bottle. Concentration: Over 200 ppm Temperature was 78 degrees f at the time of inspection.

BRINKER RESTAURANT CORP / LEGAL - CHILI'S RESTAURANT - 6909 MENAUL BLVD NE - Current Status: Conditional Approved

BRINKER RESTAURANT CORP / LEGAL - 6909 MENAUL BLVD NE
Food Establishment Class C - CHILI'S RESTAURANT
Inspection Date: 2/26/2025 Inspection #: PT0044656 Inspection Result: Conditional Approved

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

- Package Integrity

  - Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. Instructed PIC to ensure all food with compromised packaging is not offered for sale and is segregated for return. OR PIC voluntarily discard food items in compromised packaging.

  Observed food packaging not in good condition and failing to protect the integrity of the contents of the food from adulteration or potential contaminants. Packaged Food: Mandarin oranges metal can Location: food storage shelf. Condition: dented.

  Violation corrected on site by PIC discarding can.

- Food Storage Containers Identified with Common Name of Food

  - Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

  Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: BBQ sauce plastic condiment bottle. Location: cook line.

  Violation corrected on site.

Violation: Hands Clean & Properly Washed

- When to Wash

  - Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands. Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

  Observed food employee not wash hands when required. Condition: donning new gloves when switching task

  Violation corrected on site.

Violation: Operation and Maintenance

- Using a Handwashing Sink-Operation and Maintenance

  - Handwashing facilities can become sources of contamination if the sinks used for other purposes such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purposes other than handwashing.

  Observed handwashing sink used for purposes other than handwashing. Location: hand wash sink near fryers and hand wash sink in bar area. Manner: hand wash sink near fryers being used to store food container with dry ingredients/seasonings, hand wash sink in bar area was being use to discard ice and drinks.

  Violation corrected on site

Violation: Ventilation and Hood Systems

- Ventilation Hood Systems, Filters

  - Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.

  Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur. Condition: missing hood vent filters.

Violation: Personal Cleanliness

- Effectiveness-Hair Restraints

  - Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

  Observed a food employee without proper hair restraints. Location: dinning area. Activity: serving plates of ready to eat food to consumers in dinning area.

  Violation corrected on site

- Prohibition-Jewelry

  - Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

  Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: cooking chicken. Inappropriate Jewelry Observed: wrist watch.

  Violation corrected on site

Violation: Plumbing

- System Maintained in Good Repair

  - Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

  Observed floor drain in bar area is not maintained in good repair or is not repaired by law. Observed floor drain in bar area found in disrepair by missing strainer.

  Violation corrected on site.

- Backflow Prevention, Air Gap

  - During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow

  Observed: Observed an inadequate air gap at floor drain in bar area and floor drain in kitchen .

Violation: Storage

- Storage of Soiled Linens

  - Soiled linens may directly or indirectly contaminate food. Proper storage will reduce the possibility of contamination of food, equipment, utensils, and single-service and single-use articles. Instructed PIC to discontinue storage of soiled linens. Reminded person in charge that soiled linens shall be kept in clean, nonabsorbent receptacles or clean, washable laundry bags and stored and transported to prevent contamination of food, clean equipment, clean utensils, and single-service and single-use articles.

  Observed: Observed soiled linens improperly stored in facility . Soiled linens stored on food perp table.

BUSY BEES CHILDCARE - BUSY BEES CHILDCARE - 300 PANORAMA DR NE - Current Status: Approved

BUSY BEES CHILDCARE - 300 PANORAMA DR NE
Food Establishment Class C - BUSY BEES CHILDCARE
Inspection Date: 2/25/2025 Inspection #: PT0142920 Inspection Result: Approved

Violation: Personal Cleanliness

- Eating, Drinking, or Using Tobacco Products

  - A food employee may drink from a closed beverage container if the container is handled to prevent the contamination of the employee's hands, the container, and exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles. Instructed PIC that employee drinks should be kept in a designated area away from food preparation areas and should be in a cup with a lid and straw.

  Observed a food employee with an improper drink. Location: on shelf directly next to spice containers above microwave .Type of Drink: opened can of energy drink without a lid or straw and not in an closed beverage container.

Violation: Toilet Facilities

- Toilet Rooms, Enclosed

  - Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.

  Observed toilet room is not equipped with a tight-fitting self-closing door; or the door is propped open.

CAKE - CAKE - 515 CENTRAL AVE NW - Current Status: Closure Re-Inspection Required

CAKE - 515 CENTRAL AVE NW

Food Establishment Class B - CAKE

Inspection Date: 2/28/2025 Inspection #: PT0154941 Inspection Result: Closure Re-Inspection Required

Violation: Poisonous and Toxic/Chemical Substances

- Common Name-Working Containers

  - When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

  Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: plastic spray bottle. Alleged Material: Degreaser

- Separation-Storage

  - Poisonous or toxic materials shall be stored and displayed for retail so they cannot contaminate food, equipment, utensils, linens, and single-service and single-use articles by separating the poisonous or toxic materials by spacing or partitioning and locating the poisonous or toxic materials in an area that is not above food, equipment, utensils, linens, and single-service and single-use articles. Instructed PIC to move toxic chemicals to an approved location and that contaminated single-service and single-use articles must be discarded.

  Observed poisonous or toxic materials stored in a manner that has the potential to contaminate food. Poisonous/Toxic Substance: degreaser purple toxic substance. Location: liquor shelf next to open bottles on alcohol.

Violation: Operation and Maintenance

- Handwashing Signage

  - In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.

  Observed handwashing sink(s) without a handwashing sign. Location: Hand wash sink near ice machine in back room

- Using a Handwashing Sink-Operation and Maintenance

  - Handwashing facilities can become sources of contamination if the sinks used for other purposes such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purposes other than handwashing.

  Observed handwashing sink used for purposes other than handwashing. Location: Hand wash sink bar area. Manner: storing fry cutter.

- Handwashing Cleanser, Availability

  - Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.

  Observed no handwashing cleanser available at handwashing sink(s). Location: Hand wash sink near ice machine in back room.

- Hand Drying Provision

  - Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

  Observed no approved method of hand drying at handwashing sink(s). Location: Hand wash sink in bar area

Violation: Hot & Cold Water Availability & Pressure

- Water Capacity-Quantity and Availability

  - Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during peak water usage periods.

  Observed facility with insufficient hot water. Location: Public Restrooms of insufficient hot water Temperature was Below 85 degrees at a temperature of 65- 67 degrees f at the time of inspection. Instructed pic to have corrected within 5 business days in March 7thn2025 send photo to EHD

Violation: Plumbing

- System Maintained in Good Repair

  - Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

  Observed floor drain in bar area and floor drain near ice machine in back room is not maintained in good repair or is not repaired by law. Observed floor drain in bar area and floor drain near ice machine in back room found in disrepair by missing strainers.

Violation: Storage

- Food Storage-Preventing Contamination from the Premises

  - Food must be protected from contamination of splashing water, chemical, or other foods; dust; and other contaminates. Instructed PIC to have food protected in containers/wrapping and not to store food in those areas unless the source of contamination can be mediated another way.'

  Observed food stored improperly where it was exposed to contamination from splash, dust, or other contamination. Location Bar Consumable Ice being contaminated by Bottles of Liquor st6ored into the ice at the time of inspection.

Violation: Testing Devices

- Sanitizing Solutions, Testing Devices

  - Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

  Observed no testing kit or other device to measure the concentration of chemical sanitizing solution. violation was corrected on site by providing chlorine sanitizer testing strips to PIC.

Violation: Availability

- Cleaning Agents and Sanitizers, Availability

  - Instructed PIC to make sanitizer solution at the start of each work day. Advised PIC sanitizer solution should be replaced every four hours or as needed utilizing test strips to ensure proper parts per million (PPM)

  Observed facility in operation with no sanitizer solution available.

CAKE FETISH - 6110 ALAMEDA BLVD NE, 6
Food Establishment Class C - CAKE FETISH TIN CAN ALLEY
Inspection Date: 2/27/2025 Inspection #: PT0158832 Inspection Result: Approved

Violation: Designated Areas

- Designation-Dressing Areas and Lockers

  - Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

  Observation Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Date Marking and Disposition

- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

  - Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24 hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24 hour period inside the facility. PIC voluntarily discarded food items bearing no date markings

  Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Reach in cooler and prep top cooler Food Items: tea, Desserts, boba Expiration Dates: no dates

CHICK FIL A WYOMING BLVD FSR - CHICK FIL A - 2274 WYOMING BLVD NE - Current Status: Approved

CHICK FIL A WYOMING BLVD FSR - 2274 WYOMING BLVD NE
Food Establishment Class C - CHICK FIL A
Inspection Date: 2/25/2025 Inspection #: PT0145904 Inspection Result: Closure Re-Inspection Required

Violation: Operation and Maintenance

- Using a Handwashing Sink-Operation and Maintenance

  - Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

  Observed handwashing sink(s) was observed blocked or inaccessible. Location: Chicken breading, fryer area Manner: blocked by equipment

Violation: Storage

- In-Use Utensils, Between-Use Storage

  - Dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
  Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Portion scoop Location: cold holding make table Condition of the Location: Portion scoop was in food with handle in the container with the food.

Violation: Surface Not Clean

- Nonfood Contact Surfaces - Cleaning Frequency

  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

  Observed: Observed nonfood contact surface with the build up of soil residues. The surface was located throughout the kitchen in areas such as bulk containers, walk in coolers on storage racks and fan on condenser, reach in coolers, inside and outside, the handles of equipment, the sides of the equipment, the warewashing area, drive through area including storage areas for beverages, the counter cubbies, the sides of equipment and counter areas. The condition of the surface was covered in a tremendous amount of debris build up throughout each surface.

Violation: Personal Cleanliness

- Effectiveness-Hair Restraints

  - Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

  Observed: Observed a food employee without proper hair restraints. Location: drive through

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions

  - Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on the walls and floors throughout the kitchen, warewashing area, counter, restrooms and drive through areas and to clean and sanitize the areas

  Observed: Observed significant build up and debris throughout the facility in the kitchen, warewashing area, counter, restrooms and drive through area. Facility also had sewage present remaining on floor in counter area and restroom.

Violation: Physical Facilities, Construction and Repair

- Floors, Walls and Ceilings-Cleanability

  - Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to remove or repair and replace damaged tiles, and wall areas with material that is smooth and easily cleanable.

  Predefined Comment: Observed wall junctures are not smooth and easily cleanable. The surface was located kitchen, and warewashing area. The surface was made out of metal junctures with the walls, and broken and damage tiles.

- Repairing-Premises, Structures, Attachments, and Fixtures-Methods

  - Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have all gaps, cracks and crevices repaired so that it is able to serve their intended purpose properly.
  Observed: Observed the following areas of the facility in disrepair. Observed drive through, kitchen and warewashing area in disrepair by having numerous gaps, cracks and crevices present, allowing for debris, and moisture build up and allowing harborage for insects, rodents and other pest activities.

Violation: Plumbing

- System Maintained in Good Repair, Repaired According to Law

  - Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

  Observed:
  Observed plumbing system is not maintained in good repair or is not repaired by law. Observed pipes leaking onto the floor, faucets and hoses found in disrepair by leaking.

- Backflow Prevention, Air Gap

  - During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

  Observed: Observed an inadequate air gap at warewashing area.

Violation: Sewage and Waste Water

- Conveying Sewage

  - Sewage shall be conveyed to the point of disposal through an approved sanitary sewage system or other system, including use of sewage transport vehicles, waste retention tanks, pumps, pipes, hoses, and connections that are constructed, maintained, and operated according to law.

  Observed:
  Observed sewage had backed up in the facility at the counter and restroom area, observed liquid waste present in bathroom and sewage matter in the counter area. Drains in the kitchen area were unable to drain and had liquid waste pooling in the drain.

  Facility had called plumbing crew and a sanitation crew to make repairs and clean facility.

Violation: Knowledgeable

- Knowledgeable Person In Charge

  - A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

  Observed: Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances. Facility had an on going sewage issue, with waste matter in the counter service area and restrooms, and failed to cease operations. Facility had employee with inadequate PPE cleaning the sewage matter with towels.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

  - Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
  Observed: Observed equipment food-contact surface with the build up of soil residues. Equipment Type: Milkshake machine Location: Condition of the Location: significant amount of debris present from previous usages.

CHICK FIL A WYOMING BLVD FSR - 2274 WYOMING BLVD NE
Food Establishment Class C - CHICK FIL A
Inspection Date: 2/26/2025 Inspection #: RT-FOODEST-012840-2025 Inspection Result: Approved

Violation: Plumbing

- System Maintained in Good Repair

  - Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

  Observed floor drain is not maintained in good repair or is not repaired by law. Observed floor drain found in disrepair by missing strainer.

- Backflow Prevention, Air Gap

  - During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

  Observed: Observed an inadequate air gap at at floor drain near drive up window. Drain hose for soda dispensing machine ran directly into floor drain.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

  - Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

  Observed: Observed equipment food-contact surface with the build up of soil residues. Equipment Type: Milkshake machine Location: Condition of the Location: significant amount of debris present from previous usages.

CHI-CO INC - ARBYS ROAST BEEF - 1751 JUAN TABO BLVD NE - Current Status: Approved

CHI-CO INC - 1751 JUAN TABO BLVD NE
Food Establishment Class C - ARBYS ROAST BEEF
Inspection Date: 2/27/2025 Inspection #: PT0043451 Inspection Result: Approved

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions

  - Observed ice build up and debris on the on the floor and wall coving areas in the walk in cooler underneath condenser unit and shelving at the time of inspection.

  Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove ice build up and debris and to clean and sanitize floor and wall.

Violation: Physical Facilities, Construction and Repair

- Floors, Walls and Ceilings-Cleanability

  - Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to remove broken tiles and replace with tiles so that floor is smooth and easily cleanable.

  Observed floor is not smooth and easily cleanable. The surface was located next to the walk in freezer entrance. Condition: cracked/broken tile

Violation: Plumbing

- System Maintained in Good Repair

  - Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions. Instructed PIC to contact repair personnel to have leak repaired at three compartment sink. PIC must provide follow up information to CHPD for verification when repairs are made.

  Observed plumbing system at three compartment sink is not maintained in good repair or is not repaired by law. Observed three compartment sink found in disrepair by an active water leak observed under middle sink basin, causing standing water on floor at the time of inspection.

COA - FAMILY & COMMUNITY SVCS - MCKINLEY CHILD DEVELOPMENT CENTER - 3401 MONROE ST NE - Current Status: Approved

COA - FAMILY & COMMUNITY SVCS - 3401 MONROE ST NE
Food Establishment Class B - MCKINLEY CHILD DEVELOPMENT CENTER
Inspection Date: 2/26/2025 Inspection #: PT0114350 Inspection Result: Approved

Violation: Designated Areas

- Designated Areas-Employee Accommodations for eating/drinking/smoking

  - Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

  Observation Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

- Food Storage Containers Identified with Common Name of Food

  - Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

  Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification.
  Working Container of Food: flour Location: Cabinet

COA - FAMILY & COMMUNITY SVCS - SINGING ARROW CDC - 13001 SINGING ARROW SE - Current Status: Approved

COA - FAMILY & COMMUNITY SVCS - 13001 SINGING ARROW SE
Food Establishment Class B - SINGING ARROW CDC
Inspection Date: 2/26/2025 Inspection #: PT0104639 Inspection Result: Approved

Violation: Hot & Cold Water Availability & Pressure

- Water Pressure

  - Inadequate water pressure could lead to situations that place the public health at risk such as improper handwashing or equipment operation. Water under pressure must be provided to all fixtures, equipment, and nonfood equipment that are required to use water. Instructed PIC to contact repair personnel to have water pressure restored to middle hand washing sink.
  Observed fixture with inadequate water pressure Location: Women's restroom middle hand washing sink Manner: Observed water is almost at a trickle when turned on at the time of inspection.

Violation: Plumbing

- System Maintained in Good Repair

  - Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions. Instructed PIC to contact repair personnel to have handle repaired.

  Observed hand washing sink in women's restroom is not maintained in good repair or is not repaired by law. Observed hand washing sink found in disrepair by observing a leak at the cold water handle when the water is turned on, at the hand washing sink closest to the door at the time of inspection.

COMFORT FOODS CO - PACKING & PROCESSING LLC - COMFORT FOODS CO - PACKING & PROCESSING LLC - 9900 MONTGOMERY BLVD NE - Current Status: Approved

COMFORT FOODS CO - PACKING & PROCESSING LLC - 9900 MONTGOMERY BLVD NE
Food Processor Class D - COMFORT FOODS CO - PACKING & PROCESSING LLC
Inspection Date: 2/28/2025 Inspection #: PT0155214 Inspection Result: Approved

Violation: Hot & Cold Water Availability & Pressure

- Water Pressure

  - Observed facility with inadequate water pressure at the hand washing closest to doors to storage area. Observed water from faucet is not more than a trickle at the time of inspection.
  Inadequate water pressure could lead to situations that place the public health at risk such as improper handwashing or equipment operation. Water under pressure must be provided to all fixtures, equipment, and nonfood equipment that are required to use water. Instructed PIC to have hand washing sink repaired. Observed repair personnel was able to repair hand washing sink and restore water pressure during inspection. Violation corrected on site.

Violation: Physical Facilities, Construction and Repair

- Floors, Walls and Ceilings-Cleanability

  - Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to repair flooring and/or replace with material that is smooth and easily cleanable.
  Observed a section of the floor in between drain grates in acidified food processing area is not smooth and easily cleanable by being cracked with a section of top layer of flooring missing at the time of inspection.

Violation: Testing Devices

- Sanitizing Solutions, Testing Devices

  - 4-302.14, 4-501.116
  Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device. Observed PIC was able to obtain test strips during inspection. Violation corrected on site.

  4-302.14, 4-501.116
  Observed testing kit or other device used to measure the concentration of chemical sanitizing solution was expired at the time of inspection.

Violation: Warewashing Temperature and Concentration

- Sanitizers, Criteria-Chemicals

  - 4-501.114, 4-703.11(C)
  Observed chemical solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Type of Sanitizer: Quat. Location: Three compartment sink dispenser in acidified foods processing area. Concentration: 0 ppm. Observed Dispenser is not operational by not pumping chemical from chemical container at the time of inspection.

  4-501.114, 4-703.11(C)
  The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for sanitizer utilized it must be at the manufacturer specified concentration and temperature range with a contact time of 30 seconds. Manufacturer Specified Concentration: 200 -300 ppm. Manufacturer Specified Temperature: 75*F PIC must correct violation by contacting repair personnel to have dispenser repaired. PIC must also provide CHPD with follow up documentation for verification. Observed PIC was able to repair dispenser at the time of inspection. Quat testing at 200 ppm. Violation corrected site.

Cup of Cozy LLC - Cup of Cozy - 2105 VISTA OESTE NW - Current Status: Approved

Cup of Cozy LLC - 2105 VISTA OESTE NW
Food Establishment Class C - Cup of Cozy
Inspection Date: 2/27/2025 Inspection #: RT-FOODEST-013767-2025 Inspection Result: Approved

Violation: Plumbing

- Backflow Prevention, Air Gap

  - During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

  Observed an inadequate air gap at floor drain located underneath the espresso machine.

DION'S - DION'S - 10010 COORS BYPASS NW - Current Status: Approved

DION'S - 10010 COORS BYPASS NW
Food Establishment Class C - DION'S
Inspection Date: 2/27/2025 Inspection #: PT0043166 Inspection Result: Approved

Violation: Surface Not Clean

- Nonfood Contact Surfaces - Cleaning Frequency

  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

  Observed nonfood contact surface with the build up of soil residues.
  The surface was conveyor oven in sandwich make area, oven and reach in coolers in pizza make area.
  The surface was made out of stainless steel
  The condition of the surface was soiled in food residue and debris build up

Violation: Personal Cleanliness

- Effectiveness-Hair Restraints

  - Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

  Observed a food employee without proper hair restraints.
  Location: Kitchen make line
  Activity: Observed multiple employees handling food with out a beard guard

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions

  - Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on facility floors through out the kitchen and under equipment and to clean and sanitize on a regular basis.

  Observed build up and debris on the facility floors through out the kitchen and under equipment.

Violation: Testing Devices

- Sanitizing Solutions, Testing Devices

  - Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

  Observed no testing kit or other device to measure the concentration of chemical sanitizing solution. Facility is using quat sanitizer.

Violation: Warewashing Temperature and Concentration

- Sanitizers, Criteria-Chemicals

  - The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. PIC corrected violation by making fresh 200ppm batch and refilling wiping cloth buckets.

  Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.
  Location: Multiple sanitizer buckets through out kitchen / Mechanical ware washing machine.
  Concentration: 0ppm

EL CHARRO CHEVES SPORTS RESTAURANT - EL CHARRO CHEVES SPORTS RESTAURANT - 8009 CENTRAL AVE NE, A - Current Status: Approved

EL CHARRO CHEVES SPORTS RESTAURANT - 8009 CENTRAL AVE NE, A
Food Establishment Class C - EL CHARRO CHEVES SPORTS RESTAURANT
Inspection Date: 2/28/2025 Inspection #: PT0156160 Inspection Result: Approved

Violation: Operation and Maintenance

- Handwashing Signage

  - In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.

  Observed handwashing sink(s) without a handwashing sign. Location: hand wash sink near janitor sink

- Using a Handwashing Sink-Operation and Maintenance

  - Handwashing facilities can become sources of contamination if the sinks used for other purposes such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purposes other than handwashing.

  Observed handwashing sink used for purposes other than handwashing. Location: hand wash sink near janitor sink. Manner: storing metal scrubbing pad.

  Violation corrected on site by PIC removing metal scrubbing pad.

- Handwashing Cleanser, Availability

  - Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.

  Observed no handwashing cleanser available at handwashing sink(s). Location: hand wash sink near janitor sink

Violation: Personal Cleanliness

- Prohibition-Jewelry

  - Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

  Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: preparing carne asada. Inappropriate Jewelry Observed: Wrist watch.

  Violation corrected on site by PIC removing wrist watch.

Violation: Physical Facilities, Cleaning

- Drying Mops

  - Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.

  Observed a soiled mop not in use, stored directly on the floor.

Violation: Testing Devices

- Sanitizing Solutions, Testing Devices

  - The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

  Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

FAT CITY CONFECTIONS AND BAKED GOODS - FAT CITY CONFECTIONS AND BAKED GOODS - 5200 EUBANK BLVD NE, B2 - Current Status: Approved

FAT CITY CONFECTIONS AND BAKED GOODS - 5200 EUBANK BLVD NE, B2
Food Establishment Class C - FAT CITY CONFECTIONS AND BAKED GOODS
Inspection Date: 2/28/2025 Inspection #: PT0154379 Inspection Result: Approved

Violation: Plumbing

- Backflow Prevention Device, Design Standard

  - A backflow prevention device is used to avoid potential backflow of contaminated water when an air gap is not practical. The device provides a break to the atmosphere in the event of a negative pressure within the system. Minerals contained in water and solid particulate matter carried in water may coat moving parts of the device or become lodged between them over time. This may render the device inoperative. To minimize such an occurrence, only devices meeting certain standards of construction, installation, maintenance, inspection, and testing for that application may be used. The necessary maintenance can be facilitated by installing these devices in accessible locations. Instructed PIC to install an approved backflow prevention device at service sink.

  Observed backflow prevention device not installed at service sink faucet at the time of inspection.

Violation: Toilet Facilities

- Toilet Rooms, Enclosed

  - Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.
  Observed toilet room is not equipped with a tight-fitting self-closing door; or the door is propped open.

Violation: Date Marking and Disposition

- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

  - 3-501.17, 3-501.18
  Ready-to-eat, time/temperature control for safety food commercially prepared and opened, held longer than a 24 hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24 hour period inside the facility.

  3-501.17, 3-501.18
  Observed ready-to-eat time and temperature controlled for safety food commercially prepared opened in the facility with no date marking indicators. Location: reach in cooler Food Items: opened gallon jug of milk

FIRST FRUITS CHRISTIAN ACADEMY - FIRST FRUITS CHRISTIAN ACADEMY CAFETERIA - 500 OLIVER ROSS RD NW - Current Status: Approved

FIRST FRUITS CHRISTIAN ACADEMY - 500 OLIVER ROSS RD NW
Food Establishment Class C - FIRST FRUITS CHRISTIAN ACADEMY CAFETERIA
Inspection Date: 2/28/2025 Inspection #: PT0084238 Inspection Result: Approved

Violation: Ventilation and Hood Systems

- Ventilation Hood Systems, Drip Prevention and Adequacy

  - Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area. Use a degreaser to get the sticky grease build up off.
  Observed interior intake and exhaust air ducts with debris build up. Location: kitchen exhaust hood with grease soil buildup at the time of inspection.

Violation: Plumbing

- Approved System and Cleanable Fixtures, Designed/Installed By Law

  - Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

  Observed Hot and cold-water valves is not maintained in good repair or is not repaired by law. Observed prep sink found in disrepair by leaking and was noted on last inspection on May 20th, 2024.

FIRST UNITED METHODIST - WESLEY KIDS CHILDCARE - 314 LEAD AVE SW - Current Status: Approved

FIRST UNITED METHODIST - 314 LEAD AVE SW
Food Establishment Class C - WESLEY KIDS CHILDCARE
Inspection Date: 2/27/2025 Inspection #: PT0134009 Inspection Result: Approved

Violation: Operation and Maintenance

- Handwashing Signage

  - In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks
  Observed handwashing sink(s) without a handwashing sign. Location: Kitchen hand wash station at the time of inspection.

Violation: Physical Facilities, Construction and Repair

- Floors, Walls and Ceilings-Cleanability

  - Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have wall under the ware washing machine repaired so that it is able to serve their intended purpose so there is no entry points for insects and rodents and walls can be smooth and easily cleanable.
  Observed the following areas of the facility in disrepair. Observed wall under the ware washing sink with a hole two feet by 1 foot hole in the wall at the time of inspection.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

  - Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

  Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Can opener Location: Located in the kitchen food prep area. Blade had dry soil residue on the Blade at the time of inspection.

FREDDYS FROZEN CUSTARD & STEAKBURGERS - FREDDYS FROZEN CUSTARD & STEAKBURGERS - 131 COORS BLVD NW - Current Status: Conditional Approved

FREDDYS FROZEN CUSTARD & STEAKBURGERS - 131 COORS BLVD NW
Food Establishment Class C - FREDDYS FROZEN CUSTARD & STEAKBURGERS
Inspection Date: 2/25/2025 Inspection #: PT0160166 Inspection Result: Conditional Approved

Violation: Operation and Maintenance

- Handwashing Cleanser, Availability

  - Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sinks or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.

  Observed no handwashing cleanser available at handwashing sink Location: as soon as you walk into the food prep areas at the time of inspection.

Violation: Ventilation and Hood Systems

- Mechanical-Ventilation

  - Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area

  Observed interior intake and exhaust air ducts with debris build up. west side grill and filter hood vents at the time of inspection.

Violation: Maintenance and Operation

- Good Repair and Proper Adjustment-Equipment

  - A utensil can act as a source of contamination to the food it contacts if it is not maintained in good repair. Instructed PIC to repair or replace utensil.

  Observed utensils in a state of poor repair. Type: Tomato Slicer. The condition of the utensils: Blade was worn out and damaged at the time of inspection.

Violation: Surface Not Clean

- Nonfood Contact Surfaces - Cleaning Frequency

  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface

  Observed nonfood contact surface with the buildup of soil residues. The surface was located Kitchen Food prep area. The surface was made out of metal The food handling equipment and storage shelving had excessive grease and soil build up at the time of inspection.

Violation: Personal Cleanliness

- Effectiveness-Hair Restraints

  - Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

  Observed a food employee without proper hair restraints. Location: Food prep area Observed two employees preparing food without the required beard guards at the time of inspection.

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions

  - Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on Floors and walls under food Handling equipment, storage racks Sinks, dishwasher.

  Observed build up and debris and grease on the Floors and walls under food Handling equipment, storage racks Sinks, dishwasher at the time of inspection.

Violation: Cold Holding

- Time/Temperature Control for Safety Food, Cold Holding

  - The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.

  Observed insufficient cold holding equipment to properly hold food cold. Location: front Make table main prep area Raw hamburgers 44 degrees, sauteed Onions 59 degrees, Bean Patties 45 degrees, sliced beef 45 degrees .

Violation: Warewashing Temperature and Concentration

- Sanitizers, Criteria-Chemicals

  - The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. PIC corrected violation by Pic remaking the sanitizer buckets of concentration of 200 ppm at 75 degrees f. Predefined Comment:

  Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location Front food prep workstation Concentration: Tested at 100 ppm at a temperature of 27 degrees f. at the time of inspection.

HANNAH & NATES PLACE - HANNAH & NATES PLACE - 6251 RIVERSIDE PLAZA NW, B-4 - Current Status: Conditional Approved

HANNAH & NATES PLACE - 6251 RIVERSIDE PLAZA NW, B-4
Food Establishment Class C - HANNAH & NATES PLACE
Inspection Date: 2/25/2025 Inspection #: PT0046199 Inspection Result: Conditional Approved

Violation: Poisonous and Toxic/Chemical Substances

- Separation-Storage

  - The storage of poisonous or toxic materials directly above or adjacent to food could result in contamination of the food from spillage. Poisonous or toxic materials must be stored so they can not contaminate food, equipment, utensils, linens, and single-service and sing-use articles by separating the poisonous or toxic materials by spacing or partitioning; and storing them in an area that is not above food, equipment, utensils, linens, and single-service or single-use articles. Instructed PIC to move chemicals to an approved location.

  Observed poisonous or toxic materials stored in a manner that has the potential to contaminate single-service and single-use articles.
  Poisonous/Toxic Substance: Chlorine sanitizer bucket
  Location: On same shelf as single use articles and next to other food equipment.

Violation: Maintenance and Operation

- Cutting Surfaces

  - Cutting surfaces such as cutting boards and blocks that become scratched and scored may be difficult to clean and sanitize. As a result, pathogenic microorganisms transmissible through food may build up or accumulate. These microorganisms may be transferred to foods that are prepared on such surfaces. Instructed PIC to resurface the cutting board, or discard if not capable of being resurfaced.

  Observed cutting surface with deep scratches and scoring which limit the ability to be effectively cleaned and sanitized.
  Location: Clean dish storage
  Type: Thin white cutting board

- Good Repair and Proper Adjustment-Equipment

  - Observed equipment components not maintained.
  Location: Kitchen
  Type of equipment: Reach in coolers
  Condition of component: Observed multiple torn and damaged door seals that need to be replaced.

  - Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Violation: Surface Not Clean

- Nonfood Contact Surfaces - Cleaning Frequency

  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

  Observed nonfood contact surface with the build up of soil residues.
  The surface was located in kitchen
  The surface was blender exterior, reach in cooler exteriors and handles, refrigeration vents in coolers.
  The condition of the surface was soiled with debris build up

Violation: Physical Facilities, Construction and Repair

- Floor and Wall Junctures, Coved, and Enclosed or Sealed

  - Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

  Observed the following areas of the facility in disrepair. Observed kitchen walls by 3 compartment sink to be in disrepair by having multiple screw holes creating large openings that can be a possibly pest entry point and prevent proper cleaning by not being sealed to be smooth, easily cleanable, non absorbent.

- Floors, Walls and Ceilings-Cleanability

  - Floors, walls, and ceilings that are constructed of smooth and durable surface materials are more easily cleaned. Floor surfaces that are graded to drain and consist of effectively treated materials will prevent contamination of foods from dust and organisms from pooled moisture. The special requirements for carpeting materials and nonabsorbent materials in areas subject to moisture are intended to ensure that the cleanability of these surfaces is retained. Instructed person in charge to repair flooring with non-absorbent, smooth and easily cleanable material.

  Observed the following areas of the facility in disrepair. Observed kitchen floors to be in disrepair by not being sealed to be smooth, easily cleanable, non absorbent.

Violation: Knowledgeable

- Knowledgeable Person In Charge

  - A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

  Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances. Knowledge Tested: PIC was not able to demonstrate knowledge or have reference material of the six reportable foodborne illnesses.

Violation: Records

- Temperature Logs

  - TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

  Observed that the food establishment does not have temperature logs available for TCS foods items. Activity of the Food: Stored, thawed, cooled, hot held

Violation: Cold Holding

- Time/Temperature Control for Safety Food, Cold Holding

  - Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

  Observed food items in cold holding unit measuring above 41°F.
  Location: Cold holding ice baths and reach in cooler
  Food Items: Sliced oranges (51*F), watermelon (48*F), Pineapple chucks (50*F), Chopped mushrooms (49*F).

HIGH DESERT CHEVRON - HIGH DESERT CHEVRON - 9633 MONTGOMERY BLVD NE - Current Status: Conditional Approved

HIGH DESERT CHEVRON - 9633 MONTGOMERY BLVD NE
Retail Food Establishment Class 3 - HIGH DESERT CHEVRON
Inspection Date: 2/28/2025 Inspection #: PT0119126 Inspection Result: Conditional Approved

Violation: Poisonous and Toxic/Chemical Substances

- Separation-Storage

  - The storage of poisonous or toxic materials directly above or adjacent to food could result in contamination of the food from spillage. Poisonous or toxic materials must be stored so they can not contaminate food, equipment, utensils, linens, and single-service and sing-use articles by separating the poisonous or toxic materials by spacing or partitioning; and storing them in an area that is not above food, equipment, utensils, linens, and single-service or single-use articles. Instructed PIC to move chemicals to an approved location.

  Observed poisonous or toxic materials stored in a manner that has the potential to contaminate single-service and single-use articles.
  Poisonous/Toxic Substance: bottles of bleach Location: storage shelf in storage room.

Violation: Operation and Maintenance

- Hand Drying Provision

  - Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

  Observed no approved method of hand drying at handwashing sink(s). Location: hand wash station storage room north wall.

Violation: Pest Control

- Removing Dead or Trapped Birds, Insects, Rodents and other Pest

  - Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

  Observed: Observed dead pests allowed to accumulate in facility. Location: Storage room. Pest Type: Cockroach Pest Condition: Dead

Violation: Physical Facilities

- Outer Openings, Protected

  - Walls and roofs provide a barrier to protect the interior and foods from the weather, windblown dirt and debris, and flying insects. Perimeter walls and roofs of a food establishment shall effectively protect the establishment from the weather and the entry of insects, rodents, and other animals.

  Observed doors to the outside that are not tight fitting, light can be seen at the edges.

Violation: Receptacle Condition

- Covering Receptacles

  - Waste bins with food residue must have tight fitting lids or doors and be emptied once they are filled. Instructed PIC empty the waste bin(s) and to ensure that waste bins are kept sanitary by installing tight fitting lids and emptying the bins once they are filled.

  Observed: Observed waste bins inside the food establishment that have food residue but are not covered. The bins are not in continuous use. Location: outside facility northeast corner of property.

Violation: Plumbing

- System Maintained in Good Repair

  - Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

  Observed commode/toilet is not maintained in good repair or is not repaired by law. Observed commode/toilet found in disrepair by leaking.

- Backflow Prevention, Air Gap

  - During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

  Observed an inadequate air gap at floor drain near three compartment sink.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

  - Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

  Observed equipment food-contact surface with the build up of soil residues. Equipment Type: Ice machine Location: Storage room Condition of the Location: substantial build up a black mold like substance

ICICLES - ICICLES - 2300 CENTRAL AVE SE, C-1 - Current Status: Approved

ICICLES - 2300 CENTRAL AVE SE, C-1
Food Establishment Class C - ICICLES
Inspection Date: 2/25/2025 Inspection #: RT-FOODEST-010042-2025 Inspection Result: Approved

LA LUZ EARLY CHILDHOOD - 1301 BRITT ST
Food Establishment Class C - LA LUZ EARLY CHILDHOOD
Inspection Date: 2/26/2025 Inspection #: PT0047276 Inspection Result: Approved

Violation: Poisonous and Toxic/Chemical Substances

- Common Name-Working Containers

  - Drying agents used in conjunction with sanitization shall contain only components that are listed as generally recognized as safe in 21 CFR or is the subject of an effective Food Contact Notification by the FDA. Instructed PIC to use only approved drying agents and that any equipment or utensils cleaned and sanitized in conjunction with the drying agent must be re-cleaned and sanitized properly prior to use.

  Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: spray bottle Alleged Material: disinfectant

Violation: Surface Not Clean

- Nonfood Contact Surfaces - Cleaning Frequency

  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

  Observed nonfood contact surface with the build up of soil residues. The surface was located in the food preparation area. Type of surface undercounter shelving areas. Condition: Observed debris and build up on the shelving areas.

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions

  - Observed build up and debris on the floor behind reach in cooler and freezer.

  Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris and to clean and sanitize floor areas.

LA PETITE ACADEMY INC. - LA PETITE ACADEMY - 4910 KACHINA ST NW - Current Status: Approved

LA PETITE ACADEMY INC. - 4910 KACHINA ST NW
Food Establishment Class C - LA PETITE ACADEMY
Inspection Date: 2/26/2025 Inspection #: PT0043233 Inspection Result: Approved

Violation: Surface Not Clean

- Nonfood Contact Surfaces - Cleaning Frequency

  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

  Observed nonfood contact surface with the build up of soil residues.
  The surface was located inside kitchen storage cabinetry
  The surface was made out of wood
  The condition of the surface was soiled with soil and debris accumulation

Violation: Physical Facilities, Construction and Repair

- Floor and Wall Junctures, Coved, and Enclosed or Sealed

  - Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have south wall inside pantry repaired so that it is able to serve its intended purpose properly.

  Observed the following areas of the facility in disrepair. Observed south wall inside pantry in disrepair by having multiple unsealed 1/4 inch screw holes.

Violation: Toilet Facilities

- Toilet Rooms, Enclosed

  - Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.

  Observed toilet room directly across kitchen is not equipped with a tight-fitting self-closing door; or the door is propped open. Instructed PIC to keep kitchen door closed to prevent contamination from the environment.

LIFE SPIRE ASSISTED LIVING - LIFESPIRE ASSISTED LIVING - 9151 HIGH ASSETS WAY NW - Current Status: Approved

LIFE SPIRE ASSISTED LIVING - 9151 HIGH ASSETS WAY NW
Food Establishment Class C - LIFESPIRE ASSISTED LIVING
Inspection Date: 2/24/2025 Inspection #: PT0096112 Inspection Result: Approved

Violation: Ventilation and Hood Systems

- Heating, Ventilation, Air Conditioning System Vents

  - Observed interior intake and exhaust air ducts with debris build up. Location: Above kitchen and dry storage room.

  - Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Violation: Maintenance and Operation

- Cutting Surfaces

  - Observed cutting surface with deep scratches and scoring which limit the ability to be effectively cleaned and sanitized.
  Location: Inside kitchen storage cabinet
  Type: 2 cutting boards used for food prep (one red / one green).

  - Cutting surfaces such as cutting boards and blocks that become scratched and scored may be difficult to clean and sanitize. As a result, pathogenic microorganisms transmissible through food may build up or accumulate. These microorganisms may be transferred to foods that are prepared on such surfaces. Instructed PIC to resurface the cutting board, or discard if not capable of being resurfaced.

- Good Repair and Proper Adjustment-Equipment

  - Observed equipment components not maintained.
  Location: Kitchen
  Type of equipment: Reach in cooler
  Condition of component: Torn and damaged door seals

  - Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Violation: Pest Control

- Removing Dead or Trapped Birds, Insects, Rodents and other Pest

  - Observed pests allowed to accumulate in traps.
  Location: On kitchen glue taps
  Pest Type: Cockroach
  Pest Condition: Dead
  Number of Pests Present: +15

  - Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Violation: Surface Not Clean

- Nonfood-Contact Surfaces, Easily Cleanable

  - Observed nonfood contact surface that was not easily cleanable.
  The surface was located in kitchen storage cabinetry
  The surface was made out of wood like material
  The condition of the surface was pitted and and smooth, sealed, or easily cleanable

  - Hard-to-clean areas could result in the attraction and harborage of insects and rodents and allow the growth of foodborne pathogenic microorganisms. Well-designed equipment enhances the ability to keep nonfood-contact surfaces clean. Instructed PIC to replace the material with one that is easily cleanable or to modify the existing material so that it is easily cleanable.

- Nonfood Contact Surfaces - Cleaning Frequency

  - Observed nonfood contact surface with the build up of soil residues.
  The surface was located storage drawers
  The surface was made out of wood like material and stainless steel
  The condition of the surface was soiled with debris accumulation and debris build up where clean utensils are being stored. Also observed severe debris build up under microwave shelving and inside reach in coolers.

  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions

  - Observed build up and debris on the kitchen ceramic walls tiles / floors especially under kitchen equipment

  - Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on kitchen ceramic walls tiles / floors especially under kitchen equipment and instructed to clean and sanitize on a regular basis.

Violation: Physical Facilities, Construction and Repair

- Surface Characteristics-Indoor Areas

  - Observed the following areas of the facility in disrepair.
  Observed wooden cabinetry shelving base in disrepair by not being sealed, to prevent moisture absorption. Also observed large gaps in between cabinet / base shelf allowing for a possible pest harborage area underneath cabinets located next to sinks and where dishware's are being stored.

  - Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have wooden cabinetry shelving base repaired so that it is able to serve its intended purpose properly.

Violation: Training Records

- Food Handler Cards

  - Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

  - Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

  - Observed utensil food-contact surface with the build up of soil residues.
  Utensil Type: Observed clean dish wares in storage with debris accumulation. Also observed conveyor belt toaster oven in need of cleaning.
  Location: Kitchen

  Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

- Equipment, Food-Contact Surfaces, Nonfood-Contact Surfaces, and Utensils - Grease/Soil Deposits, Cooking Equipment

  - Observed food-contact surface of cooking equipment and pans with encrusted grease deposits or of soil residues.
  Food contact surface type: Baking trays and pans
  Location: Storage cabinet
  Condition of the Location: Observed cooking equipment with heavy carbon build up on the food contact side.

  - Food-contact surfaces of cooking equipment and pans shall be cleaned at a frequency to prevent the build up of soil residues and encrusted grease deposits. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

LITTLE BLESSINGS CHILD DEVELOPMENT CENTER - 901 86TH ST SW
Food Establishment Class C - LITTLE BLESSINGS CHILD DEVELOPMENT CENTER
Inspection Date: 2/28/2025 Inspection #: PT0131068 Inspection Result: Approved

Violation: Lighting

- Intensity-Lighting

  - Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning. Instructed pic to make the corrections by 3/3/25

  Observed inadequate amount of lighting. Location Kitchen prep area with inadequate lighting. Manner: Observed two Lighting in food prep area two Lights out and not working at the time of inspection.

Violation: Plumbing

- Approved System and Cleanable Fixtures, Designed/Installed By Law

  - Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions. instructed pic to hot and cold-water vales corrected within 5 working days by 3/7/25 send photo to EHD.

  Observed hand wash station is not maintained in good repair or is not repaired by law. Observed hand wash station with very low flow hot and cold-water valves at the time of inspection.

Violation: Warewashing Temperature and Concentration

- Sanitizers, Criteria-Chemicals

  - The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55F. PIC corrected violation by PIC contacting there technician out to repair chlorine Sanitizer to the Dishwasher, instructed pic to manually wash, rinse, sanitize at the three compartments sink until dishwasher is repaired.

  Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Dishwasher tested at 25 PPM at a temperature of 130 degrees f at the time of inspection.

LITTLE CORRAL DAY SCHOOL - 10111 CONSTITUTION AVE NE
Food Establishment Class C - LITTLE CORRAL DAY SCHOOL
Inspection Date: 2/24/2025 Inspection #: PT0043147 Inspection Result: Approved

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions

  - Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on and to clean and sanitize floor areas under shelving in dry storage areas. Observed build up and debris on the floor underneath the shelving area in dry storage areas.

Violation: Toilet Facilities

- Toilet Rooms, Enclosed

  - Instructed PIC to provide the toilet rooms with a tight-fitting and self-closing door.
  Observed toilet room is not equipped with a tight-fitting self-closing door at the time of inspection.

LITTLE ROSES HOME CARE OF THE SOUTHWEST - LITTLE ROSES HOME CARE OF THE SOUTHWEST - 4917 REGINA CIR NW - Current Status: Approved

LITTLE ROSES HOME CARE OF THE SOUTHWEST - 4917 REGINA CIR NW
Food Establishment Class C - LITTLE ROSES HOME CARE OF THE SOUTHWEST
Inspection Date: 2/26/2025 Inspection #: PT0155692 Inspection Result: Approved

Violation: Pest Control

- Controlling Pests, If Present: Treatment

  - Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

  Observed pests in the facility with no control methods in place. Location Food Storage area Pest Type: Mice droppings Observed Mice dropping in the corner of the wall storage food area at the time of inspection.

Violation: Physical Facilities

- Outer Openings, Protected

  - The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entry.
  Observed holes or other gaps in the structure of the facility. Location: Food Storage area. Size: two-inch Hole in the corner of the wall and floor,

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions

  - Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on Storage food area with debris and soil build up behind containers Refrigerators and shelving.

  Observed build up and debris on the floors behind Storage food area with debris and soil build up behind containers Refrigerators and shelving at the time of inspection.

Violation: Testing Devices

- Sanitizing Solutions, Testing Devices

  - Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device

  Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Warewashing Temperature and Concentration

- Sanitizers, Criteria-Chemicals

  - The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 25-49ppm must also be at a minimum temperature of 120F with a contact time of 10 seconds. PIC corrected violation by PIC remaking sanitizer of 50 ppm at 65-degree f

  Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Kitchen wiping cloth container of 0ppm and a temperature of 70 degrees at the time of inspection.

Los Mangos Sports Bar and Grill - Los Mangos Sports Bar and Grill-Main Kitchen - 420 Central Ave AVE SW - Current Status: Approved

Los Mangos Sports Bar and Grill - 420 Central Ave AVE SW
Food Establishment Class C - Los Mangos Sports Bar and Grill-Main Kitchen
Inspection Date: 2/26/2025 Inspection #: RT-FOODEST-013002-2025 Inspection Result: Approved

Violation: Designated Areas

- Designation-Dressing Areas and Lockers

  - Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

  Observed: Facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Poisonous and Toxic/Chemical Substances

- Common Name-Working Containers

  - When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known, and the containers can be labeled properly.

  Observed: Working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottles Alleged Material: Degreaser

Violation: Operation and Maintenance

- Hand Drying Provision

  - Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

  Observed: No approved method of hand drying at handwashing sink(s). Location: Hand washing sink inside kitchen.

Violation: Lighting

- Intensity-Lighting

  - Observed: Inadequate amount of lighting. Location: Hood vent Manner: Burnt light bulbs

  - Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.

Violation: Surface Not Clean

- Nonfood Contact Surfaces - Cleaning Frequency

  - Food contact surfaces and nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
  Observed: Food contact and nonfood contact surface with the buildup of soil residues. The surface was located dishware, mixer, shelving, cutting board, kitchen equipment and utensils. Instructed PIC to clean and sanitize all areas before opening facility for operations.

Violation: Maintenance

- Maintaining Premises, Unnecessary Items and Litter

  - The presence of unnecessary articles, including equipment, which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.

  Observed items on the premises of the food establishment that is no longer used or is non-functional. Location: On shelving inside kitchen Items list: hats, unused equipment maybe DJ equipment, paint, and other construction equipment. Condition of the items: dirty and not for kitchen use.

Violation: Plumbing

- System Maintained in Good Repair, Repaired According to Law

  - Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

  Observed: Floor drains is not maintained in good repair or is not repaired by law. Observed floor drains found in disrepair by missing drain covers and foul smell coming from floor drains.

Violation: Testing Devices

- Food Temperature Measuring Devices

  - The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

  Observed: No food temperature measuring devices were not provided or readily accessible.

Los Mangos Sports Bar and Grill - 420 Central Ave AVE SW
Food Establishment Class B - Los Mangos Sports Bar and Grill
Inspection Date: 2/26/2025 Inspection #: RT-FOODEST-013019-2025 Inspection Result: Approved

Violation: Hot & Cold Water Availability & Pressure

- Water Capacity-Quantity and Availability

  - Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during peak water usage periods.

  Observed: Facility with insufficient hot water. Location: Three compartments sink Manner: No hot water available

Violation: Plumbing

- System Maintained in Good Repair, Repaired According to Law

  - Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

  Observed three compartment sink is not maintained in good repair or is not repaired by law. Observed three compartment sinks found in disrepair by substantial leak underneath three compartments sink and no running hot water.

MANZANO MESA MULTI-GEN CTR - M3C FOOD SERVICE - 501 ELIZABETH SE - Current Status: Approved

MANZANO MESA MULTI-GEN CTR - 501 ELIZABETH SE
Food Establishment Class C - M3C FOOD SERVICE
Inspection Date: 2/26/2025 Inspection #: PT0056107 Inspection Result: Approved

Violation: Ventilation and Hood Systems

- Ventilation Hood Systems, Drip Prevention and Adequacy

  - Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating equipment surface. Location: under hood system behind grill. Observed grease build up and debris on the piping and floor areas at the time of inspection.

  Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of equipment, food or food contact surfaces.

Violation: Plumbing

- System Maintained in Good Repair, Repaired According to Law

  Observed floor drain and employee toilet is not maintained in good repair or is not repaired by law. Observed toilet found in disrepair by not flushing completely at the time of inspection. Observed floor drain under prep sink found in disrepair by minimal standing water observed in the drain at the time of inspection.

  Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions. Observed other restrooms are available in facility for employee use. Instructed PIC to immediately contact repair personnel to have toilet and floor drain repaired. PIC must contact CHPD with repair follow up information for verification.

MIKES JERKY - MIKES JERKY - 10900 MENAUL BLVD NE - Current Status: Approved

MIKES JERKY - 10900 MENAUL BLVD NE
Retail Food Establishment Class 6 - MIKES JERKY
Inspection Date: 2/25/2025 Inspection #: PT0119257 Inspection Result: Approved

MORADA ALBUQUERQUE - MORADA ALBUQUERQUE - 1620 INDIAN SCHOOL RD NE - Current Status: Approved

MORADA ALBUQUERQUE - 1620 INDIAN SCHOOL RD NE
Food Establishment Class C - MORADA ALBUQUERQUE
Inspection Date: 2/26/2025 Inspection #: PT0157299 Inspection Result: Approved

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

- Food Storage Containers Identified with Common Name of Food

  - Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

  Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: pinto beans and sugar in plastic containers Location: in dry good area

Violation: Physical Facilities, Construction and Repair

- Repairing-Premises, Structures, Attachments, and Fixtures-Methods

  - Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

  Observed: Observed the following areas of the facility in disrepair. Observed Front dining prep area in disrepair by having missing ceiling tiles

Violation: Food Separation

- Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

  - Observed: Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

  Observed: Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping. Location: reach in cooler kitchen area Food Item: uncovered bags of French fries

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

  - Observed: equipment food-contact surface with the build up of soil residues. Equipment Type: Toaster Location: Kitchen area Condition of the Location: had debris build up on and in the toaster

  Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

MORADA ALBUQUERQUE - 1620 INDIAN SCHOOL RD NE
Food Establishment Class C - MORADA ALBUQUERQUE
Inspection Date: 2/26/2025 Inspection #: PT0157300 Inspection Result: Approved

Violation: Operation and Maintenance

- Using a Handwashing Sink-Operation and Maintenance

  - Handwashing facilities can become sources of contamination if the sinks used for other purposes such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purposes other than handwashing.

  Observed handwashing sink used for purposes other than handwashing. Location: Kitchen Area Manner: dirty cup inside hand washing sink basin

Violation: Surface Not Clean

- Nonfood Contact Surfaces - Cleaning Frequency

  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

  Observed: Observed nonfood contact surface with the build up of soil residues. The surface was located Kitchen Area The surface was made out of plastic and metal The condition of the reach in coolers exterior had debris build up at time of inspection

Violation: Food Separation

- Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

  - Observed: Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

  Observed: Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping. Location: inside reach in cooler in kitchen area Food Item: pitchers of uncovered water

Violation: Testing Devices

- Sanitizing Solutions, Testing Devices

  -
  Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

  Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

MURPHY EXPRESS - 1358 WYOMING BLVD NE
Retail Food Establishment Class 3 - MURPHY EXPRESS
Inspection Date: 2/27/2025 Inspection #: PT0154965 Inspection Result: Approved

Violation: Physical Facilities

- Outer Openings, Protected

  - Walls and roofs provide a barrier to protect the interior and foods from the weather, windblown dirt and debris, and flying insects. Perimeter walls and roofs of a food establishment shall effectively protect the establishment from the weather and the entry of insects, rodents, and other animals.

    Observed emergency exit door to the outside that are not tight fitting, light can be seen at the edges.

Violation: Surface Not Clean

- Nonfood Contact Surfaces - Cleaning Frequency

  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

    Observed nonfood contact surface with the build up of soil residues. The surface was located trash can drawer near beverage station. The surface was made out of metal. The condition of the surface was dirty with debris and icee syrup.

NEW MEXICO EARLY LEARNING ACADEMY - NEW MEXICO EARLY LEARNING ACADEMY - 5201 CENTRAL AVE NE - Current Status: Approved

NEW MEXICO EARLY LEARNING ACADEMY - 5201 CENTRAL AVE NE
Food Establishment Class C - NEW MEXICO EARLY LEARNING ACADEMY
Inspection Date: 2/26/2025 Inspection #: PT0159843 Inspection Result: Approved

Violation: Designated Areas

- Designated Areas-Employee Accommodations for eating/drinking/smoking

  - Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

    Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Operation and Maintenance

- Using a Handwashing Sink-Operation and Maintenance

  - Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all times for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

  Observed handwashing sink(s) was observed blocked or inaccessible. Location: Kitchen hand wash sink. of the observation. Spray Bottles stored in the hand wash station at the time of inspection.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

  - Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

  Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Kitchen prep table Can opener was observed with dry food residue on the blade at the time of inspection.

NEW OMNI HOSPITALITY LLC - HILTON INN FOOD SERVICE - 6510 AMERICAS PKWY NE - Current Status: Conditional Approved

NEW OMNI HOSPITALITY LLC - 6510 AMERICAS PKWY NE
Food Establishment Class B - HILTON INN FOOD SERVICE
Inspection Date: 2/28/2025 Inspection #: PT0092965 Inspection Result: Conditional Approved

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

- Package Integrity

  Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. Instructed PIC to ensure all food with compromised packaging is not offered for sale and is segregated for return. OR PIC voluntarily discard food items in compromised packaging.

-

Observed food packaging not in good condition and failing to protect the integrity of the contents of the food from adulteration or potential contaminants. Packaged Food: whole cranberry sauce metal can. Location: food storage shelf. Condition: dented.

Violation corrected on site by PIC discarding product.

Violation: Operation and Maintenance

- Handwashing Cleanser, Availability

  - Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.

  Observed no handwashing cleanser available at handwashing sink(s). Location: hand wash station middle of kitchen south wall.

  Violation corrected on site.

- Handwashing Signage

  - In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.

  Observed: Observed handwashing sink(s) without a handwashing sign. Location: middle of kitchen south wall

Violation: Physical Facilities

- Outer Openings, Protected

  - Walls and roofs provide a barrier to protect the interior and foods from the weather, windblown dirt and debris, and flying insects. Perimeter walls and roofs of a food establishment shall effectively protect the establishment from the weather and the entry of insects, rodents, and other animals.

  Observed doors to the outside that are not tight fitting, light can be seen at the edges.

Violation: Plumbing

- Backflow Prevention, Air Gap

  - During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

  Observed: Observed an inadequate air gap at floor drain in bar area.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

  - Instructed PIC to remake Quat sanitizer solution to proper parts per million (PPM) of 100 to 200 (PPM). Advised PIC that sanitizer solution should be made every four hours or more frequently depending on usage.

  Observed: Sanitizer wiping cloth container testing at zero parts per million (PPM).

NEWSOUL LEARNING CENTER - NEWSOUL LEARNING CENTER - 1512 WYOMING BLVD NE, K - Current Status: Approved

NEWSOUL LEARNING CENTER - 1512 WYOMING BLVD NE, K
Food Establishment Class C - NEWSOUL LEARNING CENTER
Inspection Date: 2/27/2025 Inspection #: PT0157420 Inspection Result: Approved

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

- Package Integrity

  - Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. Instructed PIC to ensure all food with compromised packaging is not offered for sale and is segregated for return. OR PIC voluntarily discard food items in compromised packaging.

  Observed food packaging not in good condition and failing to protect the integrity of the contents of the food from adulteration or potential contaminants. Packaged Food: green beans metal can and Chicken broth metal can. Location: food storage shelf. Condition: dented

Violation: Poisonous and Toxic/Chemical Substances

- Common Name-Working Containers

  - When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

  Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: plastic spray bottle. Alleged Material: bleach water

Violation: Physical Facilities

- Outer Openings, Protected

  - Walls and roofs provide a barrier to protect the interior and foods from the weather, windblown dirt and debris, and flying insects. Perimeter walls and roofs of a food establishment shall effectively protect the establishment from the weather and the entry of insects, rodents, and other animals.

  Observed doors to the outside that are not tight fitting, light can be seen at the edges.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

  - Instructed PIC to remake sanitizer to proper parts per million (PPM). Advised PIC Chlorine sanitizer solution must measure at 50 to 100 (PPM) and should be replaced every four hours or more frequently depending on usage.

  Observed: Observed chlorine sanitizer in three compartment sink testing above required parts per million (PPM) of 100 (PPM) for chlorine sanitizer.

  Violation corrected on site

PALETERIA LA MICHOACANA - PALETERIA LA MICHOACANA - 4501 4TH ST NW - Current Status: Conditional Approved

PALETERIA LA MICHOACANA - 4501 4TH ST NW
Food Establishment Class B - PALETERIA LA MICHOACANA
Inspection Date: 2/25/2025 Inspection #: PT0142782 Inspection Result: Conditional Approved

Violation: Designated Areas

- Designation-Dressing Areas and Lockers

  - Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

  Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Operation and Maintenance

- Handwashing Signage

  - In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.

  Observed handwashing sink(s) without a handwashing sign. Location: Restroom and kitchen handwashing station where missing signage.

Violation: Maintenance and Operation

- Good Repair and Proper Adjustment-Equipment

  - A utensil can act as a source of contamination to the food it contacts if it is not maintained in good repair. Instructed PIC to repair or replace utensil.

  Observed utensils in a state of poor repair.
  Type: Food prep tubs
  The condition of the utensils: Cracked, broken and damaged around top edges

- Cutting Surfaces

  - Cutting surfaces such as cutting boards and blocks that become scratched and scored may be difficult to clean and sanitize. As a result, pathogenic microorganisms transmissible through food may build up or accumulate. These microorganisms may be transferred to foods that are prepared on such surfaces. Instructed PIC to resurface the cutting board, or discard if not capable of being resurfaced.

  Observed cutting surface with deep scratches and scoring which limit the ability to be effectively cleaned and sanitized.
  Location: Kitchen / Food make line
  Type: (2) Plastic cutting boards

Violation: Physical Facilities

- Outer Openings, Protected

  - The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use. .

  Observed rear door to the outside that is not tight fitting, light can be seen at the bottom edge.

Violation: Storage

- Food Storage, Prohibited Areas

  - Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.

  Observed food stored improperly less than six (6) inches off the floor.
  Location: Rear kitchen
  Food Item: Ice cream mix

Violation: Single-Service

- Single-Service and Single-Use Articles-Use Limitations

  - Single-service and single-use articles may not be reused. Articles that are not constructed of multiuse materials may not be reused as they are unable to withstand the rigors of multiple uses, including the ability to be subjected to repeated washing, rinsing, and sanitizing. Instructed PIC that all single-service and singe-use articles being reused must be replaced with multiuse containers and/articles.

  Observed single-use containers being re-used.
  Location: Kitchen storage rack
  Use: Single use sour cream containers where being re-used.

Violation: Training Records

- Food Handler Cards

  - Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

  Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Testing Devices

- Food Temperature Measuring Devices

  - The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

  Observed food temperature measuring devices were not provided or readily accessible. Also observed no ambient thermometers available in reach in coolers.

- Sanitizing Solutions, Testing Devices

  - Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

  Observed no testing kit or other device to measure the concentration of chemical sanitizing solution. Facility is using chlorine sanitizer.

Violation: Toilet Facilities

- Toilet Rooms, Enclosed

  - Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.

  Observed toilet room is not equipped with a tight-fitting self-closing door; or the door is propped open.

Violation: Cold Holding

- Time/Temperature Control for Safety Food, Cold Holding

  - Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

  Observed food items in cold holding unit measuring above 41°F.
  Location: Rear kitchen
  Food Items: Chopped strawberries (61*F), Ice cream mix (69*F), Chopped mango (51*F), Pineapple chunks (49*).

Peter Defries Corp-Dion's - DIONS - 8010 ACADEMY RD NE - Current Status: Conditional Approved

Peter Defries Corp-Dion's - 8010 ACADEMY RD NE
Food Establishment Class C - DIONS
Inspection Date: 2/27/2025 Inspection #: PT0043178 Inspection Result: Conditional Approved

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

- Food Storage Containers Identified with Common Name of Food

  - Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

  Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Oregano plastic food container. Location: prep table shelf

- Package Integrity

  - Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. Instructed PIC to ensure all food with compromised packaging is not offered for sale and is segregated for return. OR PIC voluntarily discard food items in compromised packaging.

  Observed: Observed food packaging not in good condition and failing to protect the integrity of the contents of the food from adulteration or potential contaminants. Packaged Food: Artichoke hearts metal can. Location: food storage shelf. Condition: dented cans

  Violation corrected on site PIC segregating cans to a do not use area.

Violation: Poisonous and Toxic/Chemical Substances

- Separation-Storage

  - Poisonous or toxic materials shall be stored and displayed for retail so they cannot contaminate food, equipment, utensils, linens, and single-service and single-use articles by separating the poisonous or toxic materials by spacing or partitioning and locating the poisonous or toxic materials in an area that is not above food, equipment, utensils, linens, and single-service and single-use articles. Instructed PIC to move toxic chemicals to an approved location and that contaminated single-service and single-use articles must be discarded.

  Observed poisonous or toxic materials stored in a manner that has the potential to contaminate food. Poisonous/Toxic Substance: Quat sanitizer wiping cloth container. Location: Prep table shelf near plastic food container storing oregano

Violation: Surface Not Clean

- Nonfood Contact Surfaces - Cleaning Frequency

  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

  Observed nonfood contact surface with the build up of soil residues. The surface was located pizza oven area. The surface was made out of stainless steel. The condition of the surface was the exterior of pizza ovens substantial debris build up.

Violation: Personal Cleanliness

- Effectiveness-Hair Restraints

  - Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

  Observed a food employee without proper hair restraints. Location: sub sandwich make station. Activity: preparing sub sandwich

Violation: Plumbing

- System Maintained in Good Repair

  - Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

  Observed floor drain under counter of beverage station is not maintained in good repair or is not repaired by law. Observed floor drain found in disrepair by missing strainer.

- Backflow Prevention, Air Gap

  - During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

  Observed: Observed an inadequate air gap at floor drain under counter of beverage station.

PLAY TO LEARN - PLAY TO LEARN KITCHEN - 10820 MENAUL BLVD NE - Current Status: Approved

PLAY TO LEARN - 10820 MENAUL BLVD NE
Food Establishment Class C - PLAY TO LEARN KITCHEN
Inspection Date: 2/25/2025 Inspection #: PT0046275 Inspection Result: Approved

Violation: Warewashing Temperature and Concentration

- Sanitizers, Criteria-Chemicals

  - Observed chemical sanitizer concentration exceeding the maximum level permitted. Type of Sanitizer: Chlorine Location: Spray Bottle Concentration: 200 ppm

  -
  Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR and to dilute chlorine sanitizer.

PRECIOUS MOMENTS CHILDCARE CTR - PRECIOUS MOMENTS DAYCARE - 6711 CHURCHILL RD SW - Current Status: Approved

PRECIOUS MOMENTS CHILDCARE CTR - 6711 CHURCHILL RD SW
Food Establishment Class B - PRECIOUS MOMENTS DAYCARE
Inspection Date: 2/28/2025 Inspection #: PT0091593 Inspection Result: Approved

Violation: Operation and Maintenance

- Handwashing Cleanser, Availability

  - Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sinks or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation. violation was corrected on site.

  Observed no handwashing cleanser available at handwashing sink(s). Location: Hand wash station Kitchen.

Violation: Testing Devices

- Sanitizing Solutions, Testing Devices

  - Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device. within 3 business days as of March 5th ,2025. Predefined Comment:

  Observed testing kit or other device to measure the concentration of chemical sanitizing solution were expired as of September 2024 at the time of inspection.

ROADRUNNER CHILD DEVELOPMENT - ROADRUNNER CHILD DEVELOPMENT - 608 CHELWOOD PARK BLVD NE - Current Status: Approved

ROADRUNNER CHILD DEVELOPMENT - 608 CHELWOOD PARK BLVD NE
Food Establishment Class C - ROADRUNNER CHILD DEVELOPMENT
Inspection Date: 2/27/2025 Inspection #: PT0097734 Inspection Result: Approved

SANTA FE BREWING - 6110 ALAMEDA BLVD NE
Food Establishment Class B - SANTA FE BREWING
Inspection Date: 2/27/2025 Inspection #: PT0156018 Inspection Result: Approved

Violation: Testing Devices

- Sanitizing Solutions, Testing Devices

  - Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

  Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Use Limitations

- Wiping Cloths, Use Limitation

  - Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

  Observed wiping cloths improperly used. Observed wiping cloths stored on table and not returned to sanitizer solution after use

SHANDIIN CHILD DEVELOPMENT CENTER - SHANDIIN CDC - 522 JUAN TABO BLVD SE - Current Status: Approved

SHANDIIN CHILD DEVELOPMENT CENTER - 522 JUAN TABO BLVD SE
Food Establishment Class B - SHANDIIN CDC
Inspection Date: 2/28/2025 Inspection #: PT0100559 Inspection Result: Approved

Violation: Physical Facilities

- Outer Openings, Protected

  - The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

  Observed back door to the outside is not tight fitting, light can be seen at the edges.

Violation: Corrective Actions

- Infestation Corrective Actions: Clean Up After Rodents

  - Food Establishments shall remove rodent droppings in accordance with current Centers for Disease Control and Prevention recommendations published on the Enforcement Authority's website. Instructed PIC that the following steps must be taken when cleaning rodent droppings: https://www.cdc.gov/healthypets/pets/wildlife/clean-up.html Clean up rodent urine and droppings Step 1: Put on rubber or plastic gloves. Step 2: Spray urine and droppings with bleach solution or an EPA-registered disinfectant until very wet. Let it soak for 5 minutes or according to instructions on the disinfectant label. Step 3: Use paper towels to wipe up the urine or droppings and cleaning product. Step 4: Throw the paper towels in a covered garbage can that is regularly emptied. Step 5: Mop or sponge the area with a disinfectant. Clean all hard surfaces including floors, countertops, cabinets, and drawers. Follow instructions below to clean and disinfect other types of surfaces. Step 6: Wash gloved hands with soap and water or a disinfectant before removing gloves. Step 7: Wash hands with soap and warm water after removing gloves or use a waterless alcohol-based hand rub when soap is not available and hands are not visibly soiled.

  Observed rodent droppings at the time of inspection. Location: in one cabinet only underneath the three compartment sink Manner: observed signs of infestation due to observing rodent droppings. No other signs of rodents or infestation in other cabinets or areas of the food service at the time of inspection.

SOLARR STAR AUNTIE ANNES - AUNTIE ANNES - 6600 MENAUL BLVD NE, F-5 - Current Status: Unsatisfactory Re-Inspection required

SOLARR STAR AUNTIE ANNES - 6600 MENAUL BLVD NE, F-5
Food Establishment Class C - AUNTIE ANNES
Inspection Date: 2/28/2025 Inspection #: PT0154261 Inspection Result: Unsatisfactory Re-Inspection required

Violation: Poisonous and Toxic/Chemical Substances

- Separation-Storage

  - The storage of poisonous or toxic materials directly above or adjacent to food could result in contamination of the food from spillage. Poisonous or toxic materials must be stored so they can not contaminate food, equipment, utensils, linens, and single-service and sing-use articles by separating the poisonous or toxic materials by spacing or partitioning; and storing them in an area that is not above food, equipment, utensils, linens, and single-service or single-use articles. Instructed PIC to move chemicals to an approved location.

  Observed poisonous or toxic materials stored in a manner that has the potential to contaminate single-service and single-use articles. Poisonous/Toxic Substance: Quat sanitizer wiping cloth container. Location: hand was station near paper towels used to dry hands

Violation: Hands Clean & Properly Washed

- When to Wash

  - Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands. Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

  Observed food employee not wash hands when required. Condition: Donning new gloved

Violation: Operation and Maintenance

- Using a Handwashing Sink-Operation and Maintenance

  - Handwashing facilities can become sources of contamination if the sinks used for other purposes such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purposes other than handwashing.

  Observed handwashing sink used for purposes other than handwashing. Manner: hand wash sink near three compartment sink Manner: storing chemicals

Violation: Storage

- In-Use Utensils, Between-Use Storage

  - Multiuse utensils which have been cleaned and sanitized can become contaminated with pathogens which can be transferred to food from utensils that have been stored on surfaces which have not been cleaned and sanitized. Instructed PIC to clean and sanitize utensils prior to continuing use, must be maintained cleaned in a regular schedule as prescribed by the code and to store items so that the risk of contamination prior to use is minimized.

  Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Plastic food scoop. Location: bulk food container storage shelf. Condition of the Location: handle in direct contact with food being stored.

Violation: Personal Cleanliness

- Prohibition-Jewelry

  - Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

  Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: preparing pretzel dough. Inappropriate Jewelry Observed: bracelet and wrist watch

Violation: Plumbing

- Backflow Prevention, Air Gap

  - During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

  Observed an inadequate air gap at floor drain under beverage station.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

  - Instructed food employee to remake Quat sanitizer solution to proper parts per million (PPM) of 100 to 200 (PPM). Advised PIC sanitizer solution must be made at the start of each work day and replaced every four hours or more frequently depending on usage.

  Observed: Observed Quat sanitizer solution testing at zero parts per million (PPM).

Violation: Date Marking and Disposition

- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

  - Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24 hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24 hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

  Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: under counter cooler. Food Items: Hot dogs, pepperoni , and cheese. Expiration Dates: No dates

SPROUTS FARMERS MARKET - SPROUTS - MEAT AND SEAFOOD - 5112 LOMAS BLVD NE - Current Status: Approved

SPROUTS FARMERS MARKET - 5112 LOMAS BLVD NE
Retail Food Establishment Class 4 - SPROUTS - MEAT AND SEAFOOD
Inspection Date: 2/27/2025 Inspection #: PT0123782 Inspection Result: Approved

Violation: Physical Facilities, Construction and Repair

- Repairing-Premises, Structures, Attachments, and Fixtures-Methods

  - Observed: Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

  Observed: Observed the following areas of the facility in disrepair. Observed Meat/Seafood department in disrepair by Having hole in wall

Violation: Plumbing

- System Maintained in Good Repair

  - Observed plumbing system is not maintained in good repair or is not repaired by law. Observed hand washing sink and three compartment sink found in disrepair by Leaking.

  - Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

SPROUTS FARMERS MARKET - SPROUTS - DELI - 5112 LOMAS BLVD NE - Current Status: Approved

SPROUTS FARMERS MARKET - 5112 LOMAS BLVD NE
Retail Food Establishment Class 5 - SPROUTS - DELI
Inspection Date: 2/27/2025 Inspection #: PT0123781 Inspection Result: Approved

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions

  - Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris and to clean and sanitize ceiling in deli area.

  Observed: Observed build up and debris on the Ceiling.

SPROUTS FARMERS MARKET - SPROUTS - GROCERY - 5112 LOMAS BLVD NE - Current Status: Approved

SPROUTS FARMERS MARKET - 5112 LOMAS BLVD NE
Retail Food Establishment Class 4 - SPROUTS - GROCERY
Inspection Date: 2/27/2025 Inspection #: PT0123780 Inspection Result: Approved

Violation: Pest Control

- Removing Dead or Trapped Birds, Insects, Rodents and other Pest

  - Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

  Observed: Observed pests/Pest droppings allowed to accumulate in traps and on surfaces. Location: Backstock area and receiving area Pest Type: Mice droppings Pest Condition: Accumulation of mice droppings

Violation: Physical Facilities, Construction and Repair

- Repairing-Premises, Structures, Attachments, and Fixtures-Methods

  - Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

  Observed: Observed the following areas of the facility in disrepair. Observed Backstop area and receiving area in disrepair by Having holes in walls, ceiling and floors

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

  - Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

  Observed equipment food-contact surface with the build up of soil residues. Equipment Type: Reach in coolers and display coolers Location: Grocery area Condition of the Location: Debris build up inside reach in coolers and display coolers

SPROUTS FARMERS MARKET - SPROUTS - BAKERY - 5112 LOMAS BLVD NE - Current Status: Approved

SPROUTS FARMERS MARKET - 5112 LOMAS BLVD NE
Retail Food Establishment Class 5 - SPROUTS - BAKERY
Inspection Date: 2/27/2025 Inspection #: PT0123779 Inspection Result: Approved

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions

  - Observed build up and debris on the Ceiling.

  Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on Celing and to clean and sanitize ceiling in bakery area.

Violation: Physical Facilities, Construction and Repair

- Repairing-Premises, Structures, Attachments, and Fixtures-Methods

  - Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

  Observed the following areas of the facility in disrepair. Observed Bakery Area in disrepair by having missing ceiling tile

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces, Nonfood-Contact Surfaces, and Utensils - Grease/Soil Deposits, Cooking Equipment

  - Food-contact surfaces of cooking equipment and pans shall be cleaned at a frequency to prevent the build up of soil residues and encrusted grease deposits. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

  Observed food-contact surface of cooking equipment and pans, can opener with encrusted grease deposits or of soil residues. Food contact surface type: Cookie Sheets Location: Bakery Area Condition of the Location: Debris build up on cookie sheets

Violation: Date Marking and Disposition

- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

  - Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24 hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24 hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

  Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Walk in cooler Food Items: container of jalapenos Expiration Dates: No dates observed

STARBUCKS 61203 - STARBUCKS - 1314 GIBSON BLVD SE - Current Status: Conditional Approved

STARBUCKS 61203 - 1314 GIBSON BLVD SE
Food Establishment Class C - STARBUCKS
Inspection Date: 2/28/2025 Inspection #: PT0156242 Inspection Result: Conditional Approved

Violation: Designated Areas

- Designated Areas-Employee Accommodations for eating/drinking/smoking

  - Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as lunch boxes purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not in jeopardy of contamination from these areas.

  Observed: Employee lunch box stored above and next to food contact surfaces coffee stainless steel containers inside reach in refrigerator. Instructed PIC to store employee personal belongings in designated area, for storage of employees clothing or other personal belongings.

Violation: Operation and Maintenance

- Handwashing Cleanser, Availability

  - Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sinks or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.

  Observed: No handwashing cleanser available at handwashing sink(s). Location: hand washing sink next to ice machine.

Violation: Ventilation and Hood Systems

- Heating, Ventilation, Air Conditioning System Vents

  - Heating, ventilating, and air conditioning systems shall be designed, installed, and maintained so that make-up air intake and exhaust vents do not cause contamination of food, contact surfaces, equipment, or utensils.

  Observed: Heating and air conditioning system vents not properly designed and located to be easily cleanable. Location: In back of facility Manner: High A/C vents with debris build up on vents and surrounding area. Instructed PIC to remove debris, clean and sanitize.

Violation: Surface Not Clean

- Nonfood Contact Surfaces - Cleaning Frequency

  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

  Observed: Nonfood contact surface with the buildup of soil residues. The surface was located in barista, dry storage, and back of facility. Debris build up underneath equipment such as cold holding units, ice machine, three compartment sink and dry storage shelving.

Violation: Personal Cleanliness

- Effectiveness-Hair Restraints

  - Observed: Food employee without proper hair restraints. Location: Barista and sandwich prep table Activity: Employees preparing beverages and sandwich

  - Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

- Prohibition-Jewelry

  - Observed: Employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Preparing beverages and sandwiches Inappropriate Jewelry Observed: Bracelets

  - Items of jewelry such as rings, bracelets, and watches may collect soil, and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Violation: Physical Facilities, Cleaning

- Drying Mops

  - Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area and to ensure that mop is stored to promote air drying.

  Observed: A soiled mop not in use, stored directly in mop sink.

Violation: Warewashing Temperature and Concentration

- Sanitizers, Criteria-Chemicals

  - Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR.

  Observed: Chemical sanitizer concentration exceeding the maximum level permitted. Type of Sanitizer: Quaternary ammonium Location: Three compartment sink Concentration: Above 400 parts per million.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

  - Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

  Observed: Equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: Back of facility dry storage area Condition of the Location: Debris build up on deflector pink and orange substance.

TERIYAKI CHICKEN BOWL 12 - TERIYAKI CHICKEN BOWL 12 - 6027 SAN MATEO BLVD NE - Current Status: Unsatisfactory Re-Inspection required

TERIYAKI CHICKEN BOWL 12 - 6027 SAN MATEO BLVD NE
Food Establishment Class C - TERIYAKI CHICKEN BOWL 12
Inspection Date: 2/25/2025 Inspection #: PT0054076 Inspection Result: Unsatisfactory Re-Inspection required

Violation: Poisonous and Toxic/Chemical Substances

- Common Name-Working Containers

  - When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

  Observation . Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: spray bottle Alleged Material: degreaser

Violation: Ventilation and Hood Systems

- Heating, Ventilation, Air Conditioning System Vents

  - Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

  Observation. Observed interior intake and exhaust air ducts with debris build up. Location: kitchen area, dining room, bathrooms

- Ventilation Hood Systems, Drip Prevention and Adequacy

  - Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.

  Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur. Condition: Hood vent filters with excessive grease build up

Violation: Pest Control

- Removing Dead or Trapped Birds, Insects, Rodents and other Pest

  - Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

  Observation. Observed pests allowed to accumulate in traps. Location: By back door Pest Type: cockroach Pest Condition: dead Number of Pests Present: two (2)

Violation: Surface Not Clean

- Nonfood Contact Surfaces - Cleaning Frequency

  - Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

  Observation. Observed nonfood contact surface with the build up of soil residues. The surface was located inside and on top of reach in coolers with food and soil debris build up on fryers, flat top and grill with substantial grease build up , rice cookers with debris build up on sides

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions

  - Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on floor walls and floor drains and to clean and sanitize areas

  Observation . Observed build up and debris on the floors, walls and floor drains though out facility behind around and under kitchen equipment. Very Substantial grease and carbon build up behind grill on main line which can pose a fire hazard

Violation: Plumbing

- System Maintained in Good Repair

  - Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

  Observed faucet is not maintained in good repair or is not repaired by law. Observed both faucets on three compartment sink found in disrepair by leaking from faucet fixture

- Backflow Prevention, Air Gap

  - During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

  Observation Observed an inadequate air gap at floor drain under soda machine under front counter

Violation: Use Limitations

- Wiping Cloths, Use Limitation

  - Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

  Observed wiping cloths improperly used. Observed wiping cloths stored on tables and cutting boards and not put back into sanitizer solution after use

Violation: Warewashing Temperature and Concentration

- Sanitizers, Criteria-Chemicals

  - Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR. PIC corrected violation by remaking sanitizer solution.

  Observed chemical sanitizer concentration exceeding the maximum level permitted. Type of Sanitizer: Chlorine sanitizer Location: main kitchen cook line Concentration: 200ppm

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

  - Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

  Observed equipment food-contact surface with the build up of soil residues. Equipment Type: Ice machine Location: kitchen area Condition of the Location: Brown and green slime build up in machine

Violation: Cooling

- Cooling Methods

  - Instructed PIC to use an alternate method of cooling to minimize the opportunity for pathogen growth; recommended to utilize one or more methods such as 1) Place the food in a shallow pan 2) Separate the food into smaller or thinner portions 3) Use rapid cooling equipment 4) Stir the food in a container placed in an ice/water bath 5) Use containers that facilitate heat transfer 6) Only partially cover product, if protected from overhead contamination.

  Observed TCS food items cooling in a method that does not facilitate the necessary rate of heat transfer to cool the food in an appropriate time frame. Location: walk in cooler Food Items: Cooked pasta Manner: Stored in walk in completely covered and wrapped.

THAI CUISINE II LLC - THAI CUISINE RESTAURANT - 4201 CENTRAL AVE NE - Current Status: Conditional Approved

THAI CUISINE II LLC - 4201 CENTRAL AVE NE
Food Establishment Class C - THAI CUISINE RESTAURANT
Inspection Date: 2/24/2025 Inspection #: PT0105939 Inspection Result: Conditional Approved

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

- Food Storage Containers Identified with Common Name of Food

  - Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

  Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: rice and sugar in white food container Location: Kitchen Area

Violation: Hands Clean & Properly Washed

- Where to Wash

  - Food employees shall only clean their hands in a handwashing sink or approved automatic handwashing facility. Effective handwashing is essential for minimizing the likelihood of the hands becoming a vehicle of cross contamination. It is important that handwashing be done only at a properly equipped handwashing facility in order to help ensure that food employees effectively clean their hands and to prevent the contamination of food preparation sinks. Food employee re-washed hands in a designated hand sink. Instructed PIC to retrain employees on proper hand washing procedures.

  Observed: Food employee was observed washing hands in not in a hand washing sink. Location: Three Compartment sink

Violation: Operation and Maintenance

- Using a Handwashing Sink-Operation and Maintenance

  - Handwashing facilities can become sources of contamination if the sinks used for other purposes such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purposes other than handwashing.

  Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

  Observed handwashing sink(s) was observed blocked or inaccessible. Location: Kitchen Area Manner: trash cans and buckets and prep table blocking hand washing sink

  Observed handwashing sink used for purposes other than handwashing. Location: Kitchen Area Manner: Broom being stored inside hand washing sink

Violation: Physical Facilities, Cleaning

- Cleaning, Frequency and Restrictions

  - Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris on and to clean and sanitize Kitchen area.

  Observed build up and debris on the the walls, ceiling and ceiling vent covers.

Violation: Physical Facilities, Construction and Repair

- Repairing-Premises, Structures, Attachments, and Fixtures-Methods

  - Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

  Observed the following areas of the facility in disrepair. Observed back kitchen area in disrepair by holes where electrical panel is located.

Violation: Preventing Contamination From Hands

- Preventing Contamination from Hands, No Barehand Contact with RTE food

  - Except when washing fruits and vegetables or ready-to-eat food that is being added as an ingredient to food that will be cooked to a temperature of at least 145 degrees. Handwashing with plain soap and water, as specified in the Food Code, may not be an adequate intervention to prevent the transmission of pathogenic microbes to ready-to-eat foods via bare hand contact. Cooking foods to the temperatures required in the Food Code will reduce the likelihood of survival of pathogens that might be transferred from an employee s hands to the surface of the ready-to-eat foods. Instructed PIC that the food contacted by the employee with bare hands must not be used in the food operation and that employees must be retrained on bare hand contact procedures with ready-to-eat food.

  Observed a food employee touching ready-to-eat food with bare hands. Activity: employee with no gloves on touching rady to eat food making spring rolls Food Contacted: rice noodle, chicken, vegetables and wrapping.

Violation: Food Separation

- Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

  - Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

  Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping.

Violation: Date Marking and Disposition

- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

  - Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24 hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24 hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

  Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Kitchens reach in cooler Food Items: chopped Jalapenos, Cucumbers, tomatoes and pineapples Expiration Dates: No dates were observed

THE BAKEHOUSE OFF THE WHEATEN PATH - THE BAKEHOUSE OFF THE WHEATEN PATH - 515 WYOMING BLVD NE - Current Status: Approved

THE BAKEHOUSE OFF THE WHEATEN PATH - 515 WYOMING BLVD NE
Food Establishment Class C - THE BAKEHOUSE OFF THE WHEATEN PATH
Inspection Date: 2/25/2025 Inspection #: PT0159428 Inspection Result: Approved

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

- Food Storage Containers Identified with Common Name of Food

  - Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

  Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: coco powder plastic food container. Location: storage shelf in dry storage room.

Violation: Operation and Maintenance

- Using a Handwashing Sink-Operation and Maintenance

  - Handwashing facilities can become sources of contamination if the sinks used for other purposes such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purposes other than handwashing.

  Observed handwashing sink used for purposes other than handwashing. Location: hand wash sink in front of facility near cash register area. Manner: being used to discard ice.

- Using a Handwashing Sink-Operation and Maintenance

  - Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

  Observed handwashing sink(s) was observed blocked or inaccessible. Location: hand wash sink near janitor sink. Manner: blocked by food storage rack

THE BLEND - THE BLEND - 4500 OSUNA RD NE, 145 - Current Status: Approved

THE BLEND - 4500 OSUNA RD NE, 145
Food Establishment Class C - THE BLEND
Inspection Date: 2/27/2025 Inspection #: PT0156203 Inspection Result: Approved

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

- Food Storage Containers Identified with Common Name of Food

  - Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

  Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: powered fruit mixes and syrups Location: front counter area

Violation: Ventilation and Hood Systems

- Heating, Ventilation, Air Conditioning System Vents

  - Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area

  Observation . Observed interior intake and exhaust air ducts with debris build up. Location: back kitchen area

Violation: Lighting

- Intensity-Lighting

  - Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.

  Observed inadequate amount of lighting. Location: Back kitchen area Manner: light bulb burned out

Violation: Storage

- In-Use Utensils, Between-Use Storage

  - During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.

  Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Scoops Location: bulk power containers Condition of the Location: stored with scoop in container with handle directly touching the product

Violation: Physical Facilities, Construction and Repair

- Repairing-Premises, Structures, Attachments, and Fixtures-Methods

  - . Poor repair and maintenance compromises the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have holes in wall repaired so that it is able to serve their intended purpose properly.

  Observation Observed the following areas of the facility in disrepair. Observed wall in rear area by ice machine in disrepair by dime sized or smaller holes in wall

Violation: Testing Devices

- Sanitizing Solutions, Testing Devices

  - Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

  Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Warewashing Temperature and Concentration

- Sanitizers, Criteria-Chemicals

  - Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Wiping cloth bucket Concentration: 0 Temperature: 0

  - The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75F with a contact time of 7 seconds. PIC corrected violation by remaking solution

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

  - Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the build up of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

  Observed equipment food-contact surface with the build up of soil residues. Equipment Type: Ice Machine Location: Back of kitchen area Condition of the Location: debris build up on bottom of ice machine
